

UPS TRAIL

1966-1967 — NO 1

Roy Jacobson, Editor

SEPTEMBER 12, 1966

R. FRANKLIN THOMPSON HALL—new UPS science complex, is the largest building project in the university's history. Cost: \$3,022,700.

Thompson Hall Springing Up

R. Franklin Thompson Hall, the newly-named science complex now under construction at the University of Puget Sound, is the largest building project in the university's history.

MacDonald Building Company of Tacoma holds a contract of \$3,022,700 for the structure, which will follow the modified Tudor gothic style used in most campus buildings.

Ground was broken Jan. 20, 1966, with completion scheduled in approximately 17 months.

The three-building complex will face Union Avenue west of the present Music Building. The departments of biology, chemistry, geology, mathematics and physics will be housed in the new structure, whose tower will give the campus a new look.

The three buildings will be in a U-shape, with the open side toward Union, once the back street to the campus but now developing into a second main approach. This has been aided by paving the divided street and landscaping the median. In recent years the university has built an athletic stadium and eight men's group housing units on the west side of the campus, which the new science complex will dominate.

The buildings will contain 114,000 square feet of space, which, when added to that of Charles E. McIntyre Hall, recently completed, will double the teaching space available to the university. McIntyre Hall is the new home of

the School of Business Administration and Economics.

Nelsen, Krona and Ziegler of Tacoma are architects.

Thompson Hall will afford the science departments of the university new and expanded facilities which have become much needed in the face of expanded enrollment and exploding scientific knowledge which requires new laboratory facilities in the modern university.

At present the sciences occupy Howarth Hall, which with Jones Hall constituted the initial physical plant when the then College of Puget Sound moved to its present campus in the early 1920's.

Still, despite limited facilities, the scientists have kept pace with their fields of knowledge.

Biology has developed a natural history museum which acquires and preserves Pacific Northwest natural history specimens for educational purposes; there are 30,000 specimens on file. The department has property on Harstine Island which is intended as the site of a marine research laboratory.

Geology has a rapidly expanding collection of rock specimens, many sent in by its graduates from distant mountain slopes and canyons. The university has be-

Trail Plug

Looking for fun, thrills, excitement? A chance to meet new and interesting people? A chance to better yourself and mankind? A chance to be in the know? Try business administration.

Otherwise, why not attach yourself to the *Trail*, your weekly newspaper, and learn what its REALLY like to be alive. Contact Roy Jacobson, editor, in the *Trail* office, room 214 in the SUB. He needs reporters, copy readers, photographers, cartoonists (especially cartoonists), artists and all-around moral support. If you don't run into him on your first visit, try again later. He's probably out looking for fun, thrills and excitement in a dedicated effort to better himself and mankind and thus end up in the know.

come a center for development of the new earth sciences curriculum for secondary school students.

Chemistry is the home of several researchers, and its chairman is the director of the University of Puget Sound Research Institute, which has received numerous grants from the federal government for studies conducted by faculty members with a wide variety of scientific interests.

Physics has added courses in the nuclear phases of the science, continued experiments in cosmic rays, and has encouraged the building of telescopes by its students. It has sponsored special courses for teachers and has participated in the Master of Science Teaching program through which the university offers graduate work to upgrade science teaching in secondary schools.

UPS To Appear On College Bowl

By ROY JACOBSON

It's only September and the University of Puget Sound already has a bowl bid. But sit down, you guys. It has nothing to do with football.

UPS is headed for the *College Bowl* this Christmas, according to Dean Robert H. Bock.

College Bowl is a question-answer network television program aired on Sundays from New York. Every week two teams of academic elite, each representing a college or university selected from this country's institutions of higher learning, lock physics formulas, metaphysical concepts and memories in a spirited and hard-fought effort on the part of each to academically smother the other. They also compete against

the clock, and the team that survives the battle claims the right to return the following week against a fresh opponent and, if again successful, each succeeding week thereafter until finally done in or forced to retire.

The UPS team will appear on the program December 25, Dean Bock said, but the actual match will be taped a week earlier. UPS was originally scheduled to appear November 13, but the date was changed at the school's request—not, he emphasized, because of the competition lined up for that time, all major universities, but because of time. UPS needs more preparation, he said, and "we'll be hard-pressed as it is." He said he has no idea who the new opponents will be yet, but he added that no opponent on *College Bowl* will be easy.

Final team selection is scheduled for early October, Dean Bock said, and he urged all interested students to try out. A screening examination will be given all team hopefuls later this month, he said. Those who survive this first cut will be screened further by the faculty and team coaches (yet to be selected), he said, until four or five team members are chosen.

Then the team will go to work. They'll drill around two hours a day twice a week until show time under conditions simulating as closely as possible those of the actual studio in New York, Dean Bock said. Closed circuit television, studio television, "lock-boards"—the whole works. The dean said he even has a box in his office right now containing over 2000 questions asked on past shows which he hopes to use during training. His formula for success on the show is "full concentration on question answering" oblivious of studio distractions.

"It can be a lot of fun, but it's no game," he cautioned. He said it takes a lot of hard work. All participants take it quite seriously, he said, and all are out for academic blood.

But the dean is quite enthusiastic about the school's chances in New York.

"We're all even when it comes to *College Bowl*, he said "Academic reputation's not important there." He pointed out that more than one school rated high academically have bitten the Sunday night dust, including Reed.

"We can dump the best of them," he predicted. "I'm confident about that."

Dean Bock said he believes the university's up-coming match on *College Bowl* will be a boon to the whole institution. And most importantly, he added, it should "weld together the student body and faculty behind a single project."

Vital Statistics On New Frosh

There's been an increase in the size of the freshman class this year without any sacrifice in quality, according to Larry R. Stenberg, UPS director of admissions.

Stenberg said about 550 freshmen will attend UPS this fall from about 271 high schools, as compared with approximately 490 last year from 221 high schools.

Fourteen students from nine foreign countries will attend the university as freshman this year. Last year 16 students attended from eight foreign countries.

Around the United States, 236 freshmen students will attend from 21 states other than Washington, which Stenberg called a significant increase over last year's 192 people from out-of-state. Most this year are from Hawaii and California. 230 freshmen will come to UPS from Washington high schools, as compared with 188 in 1965. The most significant decrease in freshman enrollment is those attending this year from Pierce County. 104 attended last year, while only 84 are expected this fall.

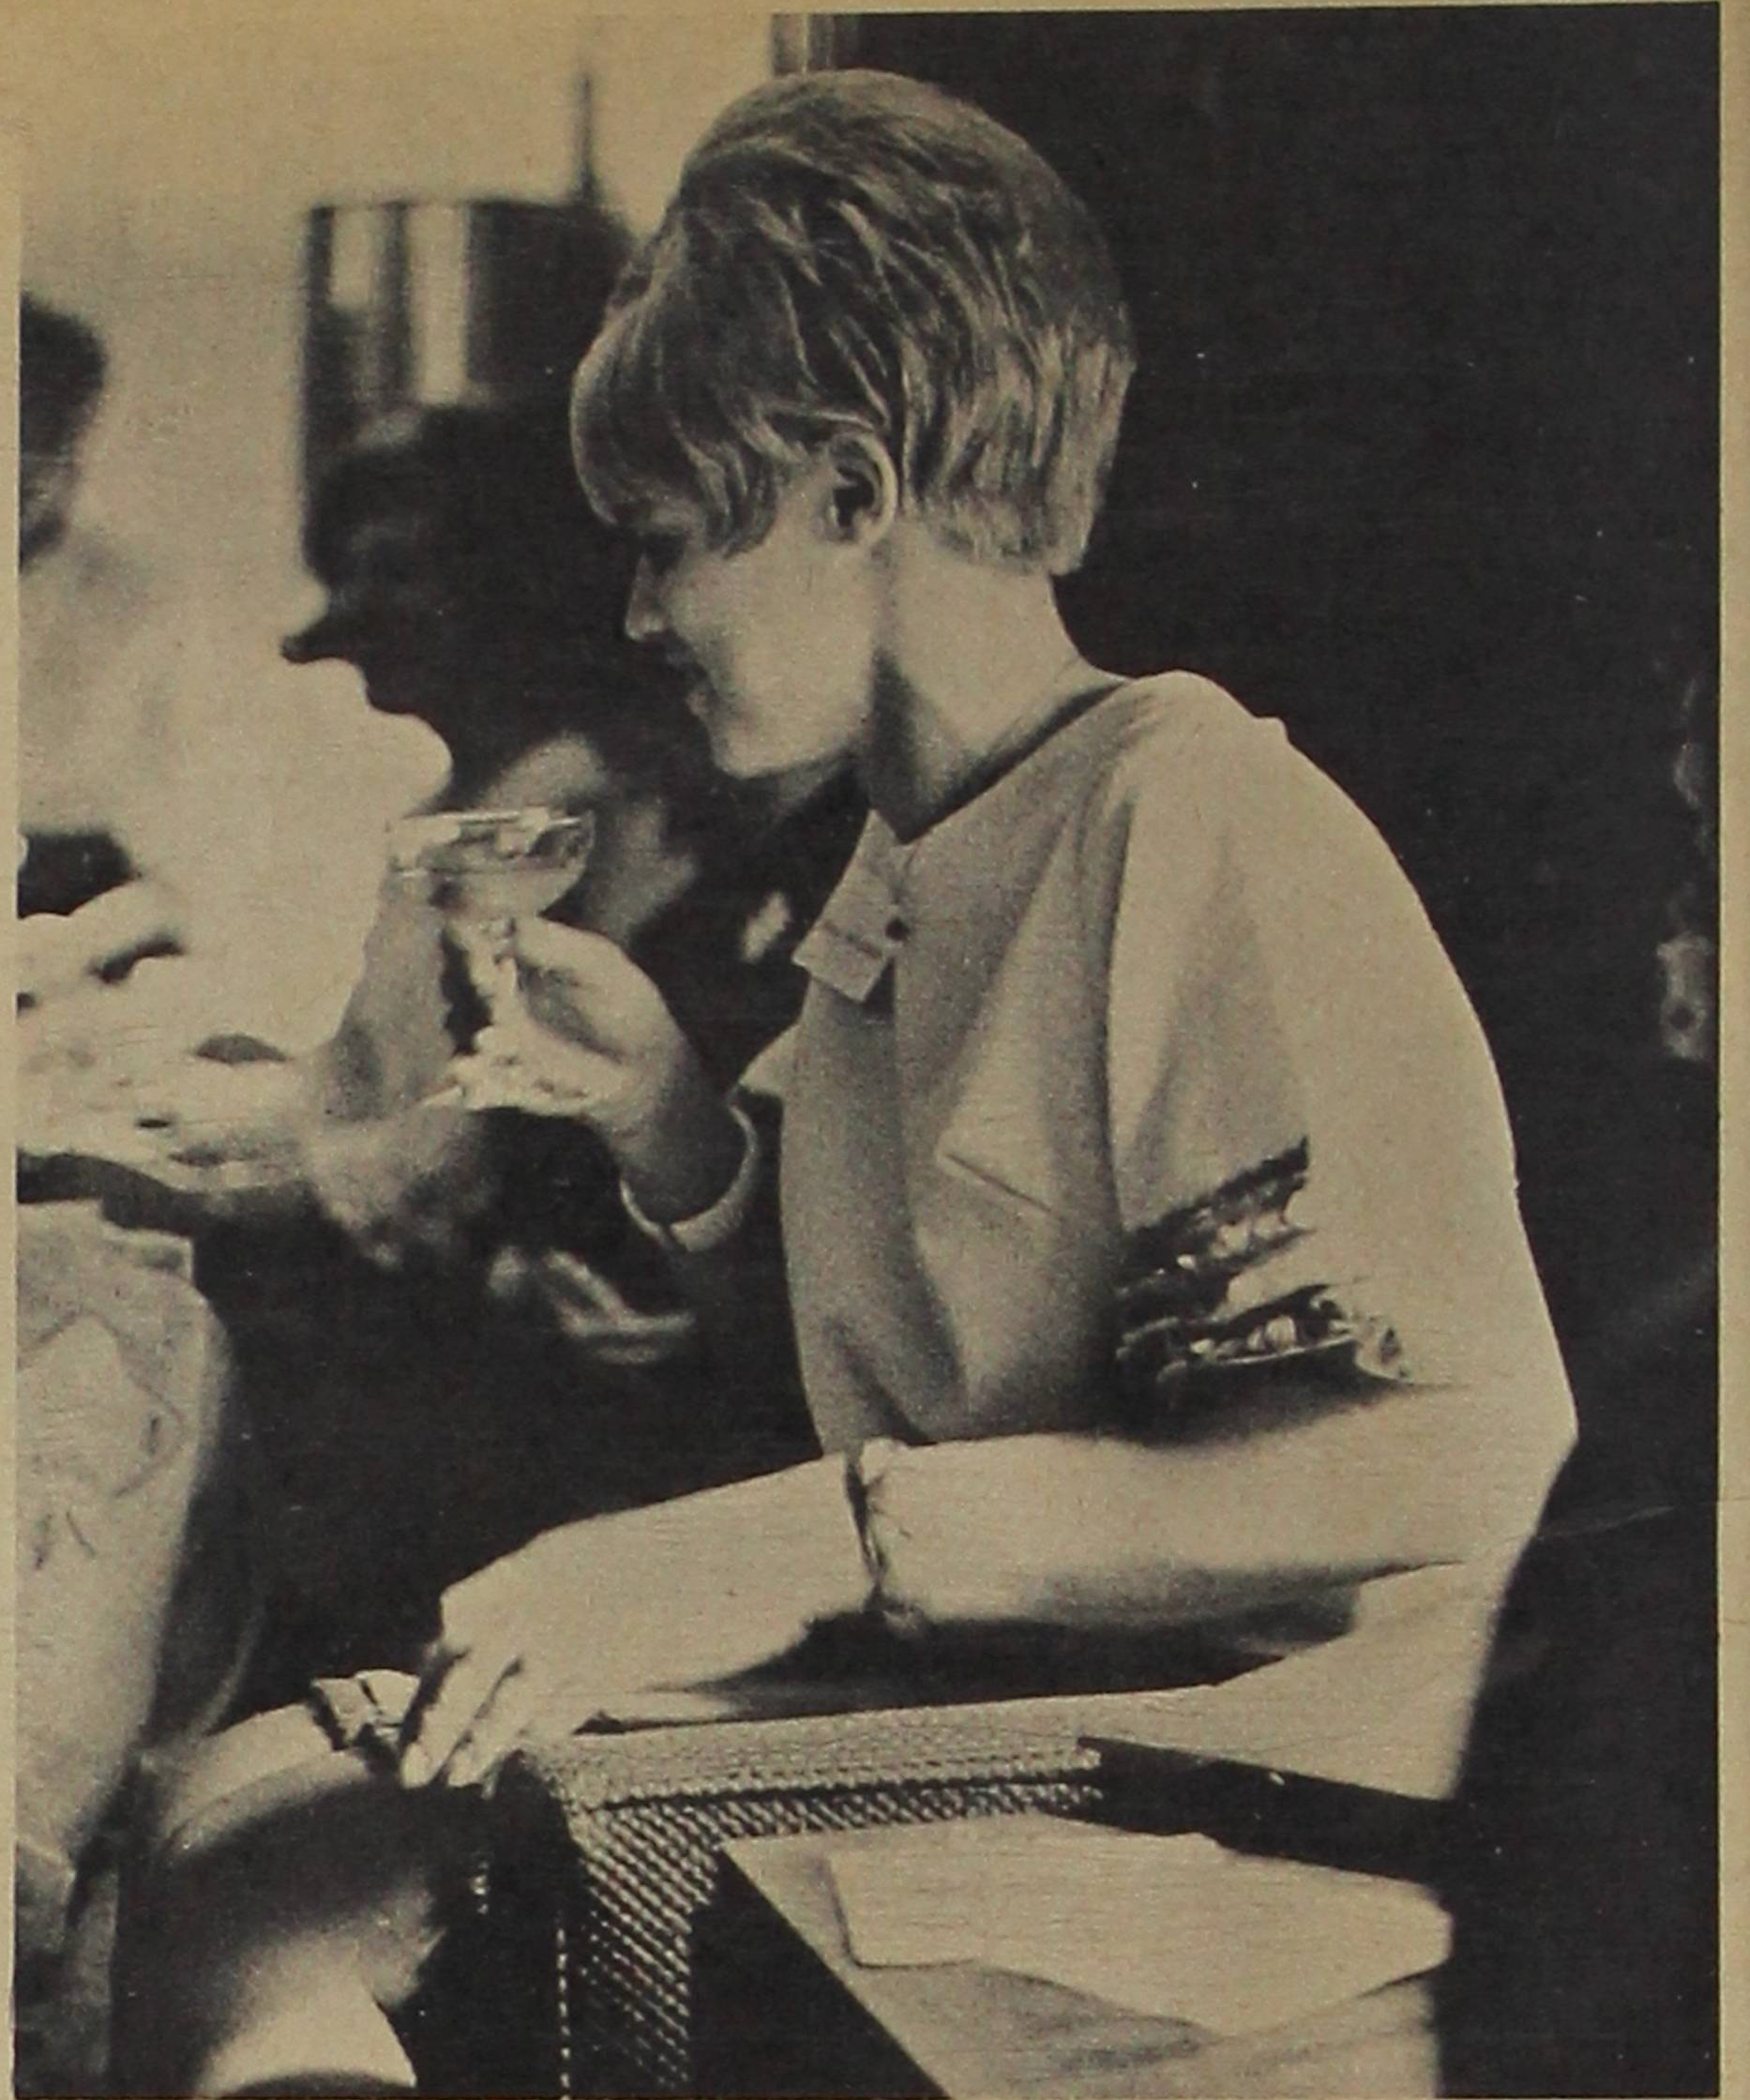

This year's class will be 46 per cent men, 54 per cent women, Stenberg said.

This year's class has a grade point average above 3.0, Stenberg said, and 13.6 percent of this year's freshmen were in the top 5 per cent of their high school class, 28.6 in the top 10 percent, and 60.5 percent in the top quarter.

1,139 Students Attended UPS Summer Session

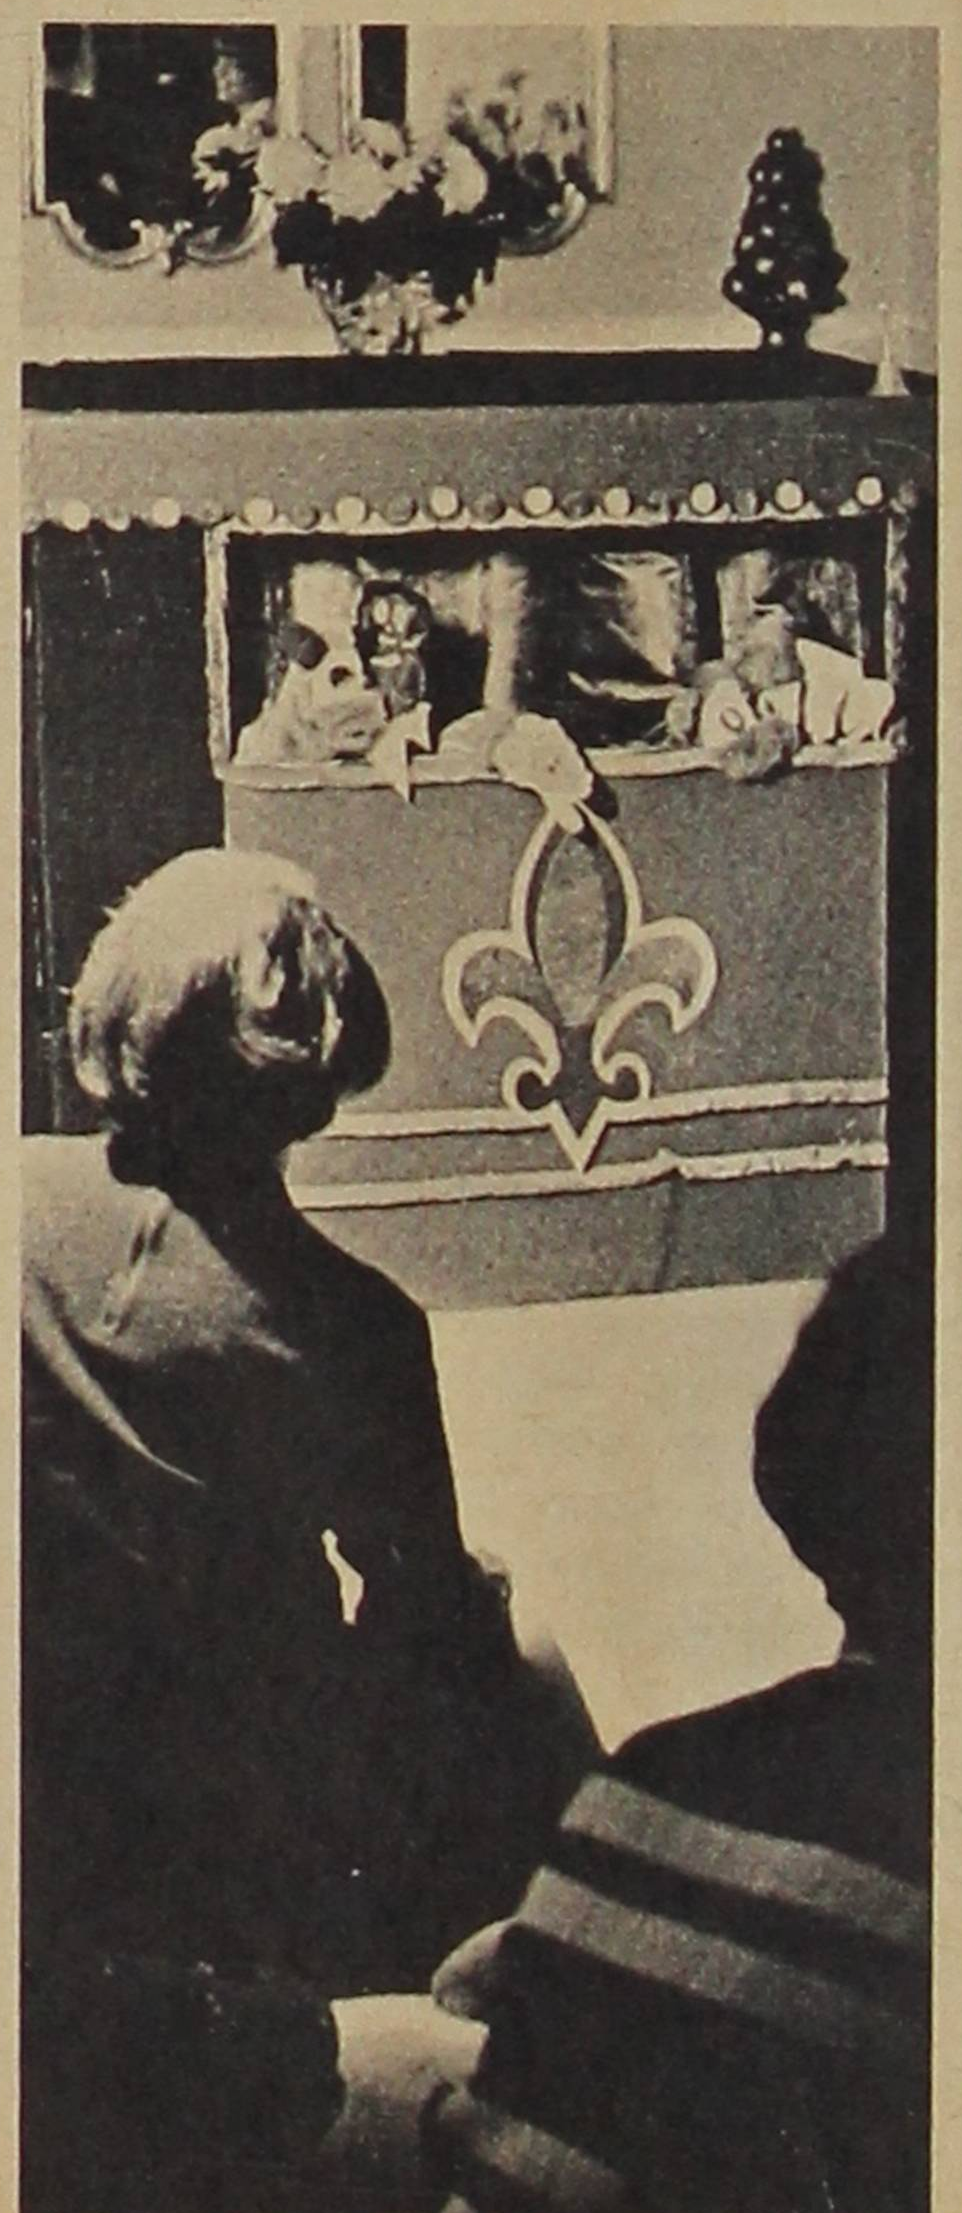

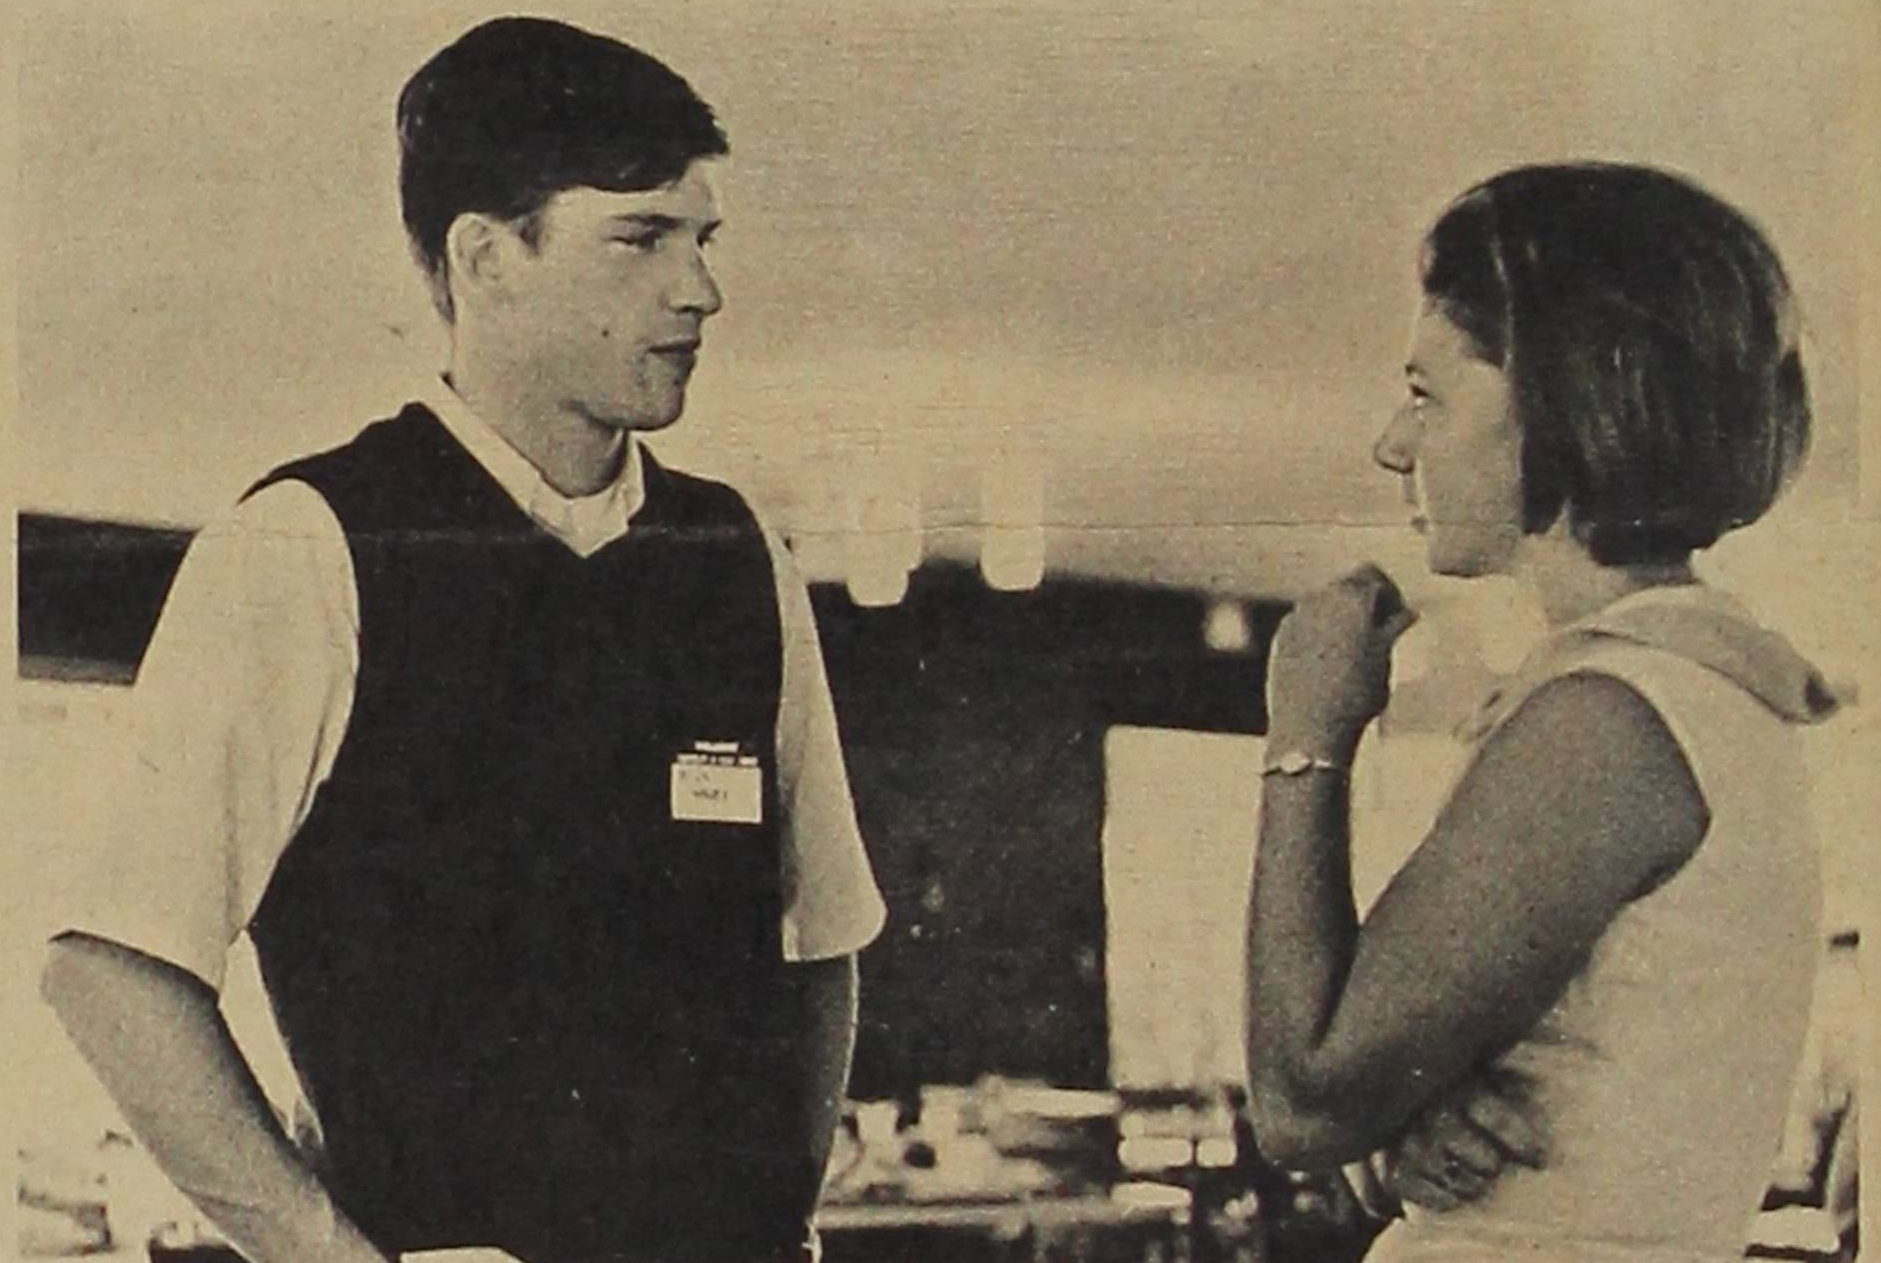

Figures released recently by Registrar Jack A. McGee show that 1,139 students attended this year's summer session at University of Puget Sound.

Dr. Delmar Gibbs, director of the summer program, indicated that wider course offerings this summer contributed to the substantial attendance figures.

New Profs Descend on UPS

Dr. Thomas B. Anderson, Psychology

Thomas B. Anderson, who has wide experience in the field of mental health in Pennsylvania and Washington states, will join the faculty at the University of Puget Sound this fall as associate professor of psychology, according to an announcement by Dean Robert H. Bock.

Dr. Anderson was director of mental health planning for the Governor's Committee on Mental Health and Mental Retardation during 1964 and 1965. He headed a staff that developed a plan for community mental health programs in Washington state.

He accepted a position with the Department of Public Welfare's Office of Mental Health in Pennsylvania in 1965. He was director of the Division of Planning, evaluation and Community Programs in the mental health field.

Earlier positions held by Dr. Anderson include a teaching assistant's assignment at Washington State University and one as teacher at North Central High School in Spokane. His doctorate in the field of education and his

master's degree were awarded him by WSU.

Mrs. Anderson also holds a doctorate. She is supervisor of guidance services in the State Department of Public Instruction in Olympia. The Andersons live in Olympia. They have two daughters and one son attending college.

Dr. Anderson is a member of Phi Delta Kappa, National Honor Society, Washington State Psychological Association, American Psychological Association and Psi, Chi, a psychology honorary.

Niels M. Dahl

Niels Marius Dahl, a 1963 graduate of the University of Puget Sound, has joined this year's business administration staff.

Dahl attended UPS from 1961-63, earning a B.A. degree in business administration. He since has earned a masters degree in transportation from the University of Washington (1965), and is presently working toward a Ph.D. there.

Originally from Denver, Colo., Dahl served as an accountant for an oil corporation in Denver from 1935-40. He joined the US Army in 1940, serving as an infantry officer and instructor in various military schools, including the US Army Command and General Staff College, Ft. Leavenworth, Kan.

He has traveled throughout the South Pacific and Far East, including mainland China.

Dahl is affiliated with Alpha Kappa Psi, men's business fraternity, and was awarded a doctoral fellowship from the National Defense Transportation Association.

He is married and has two children.

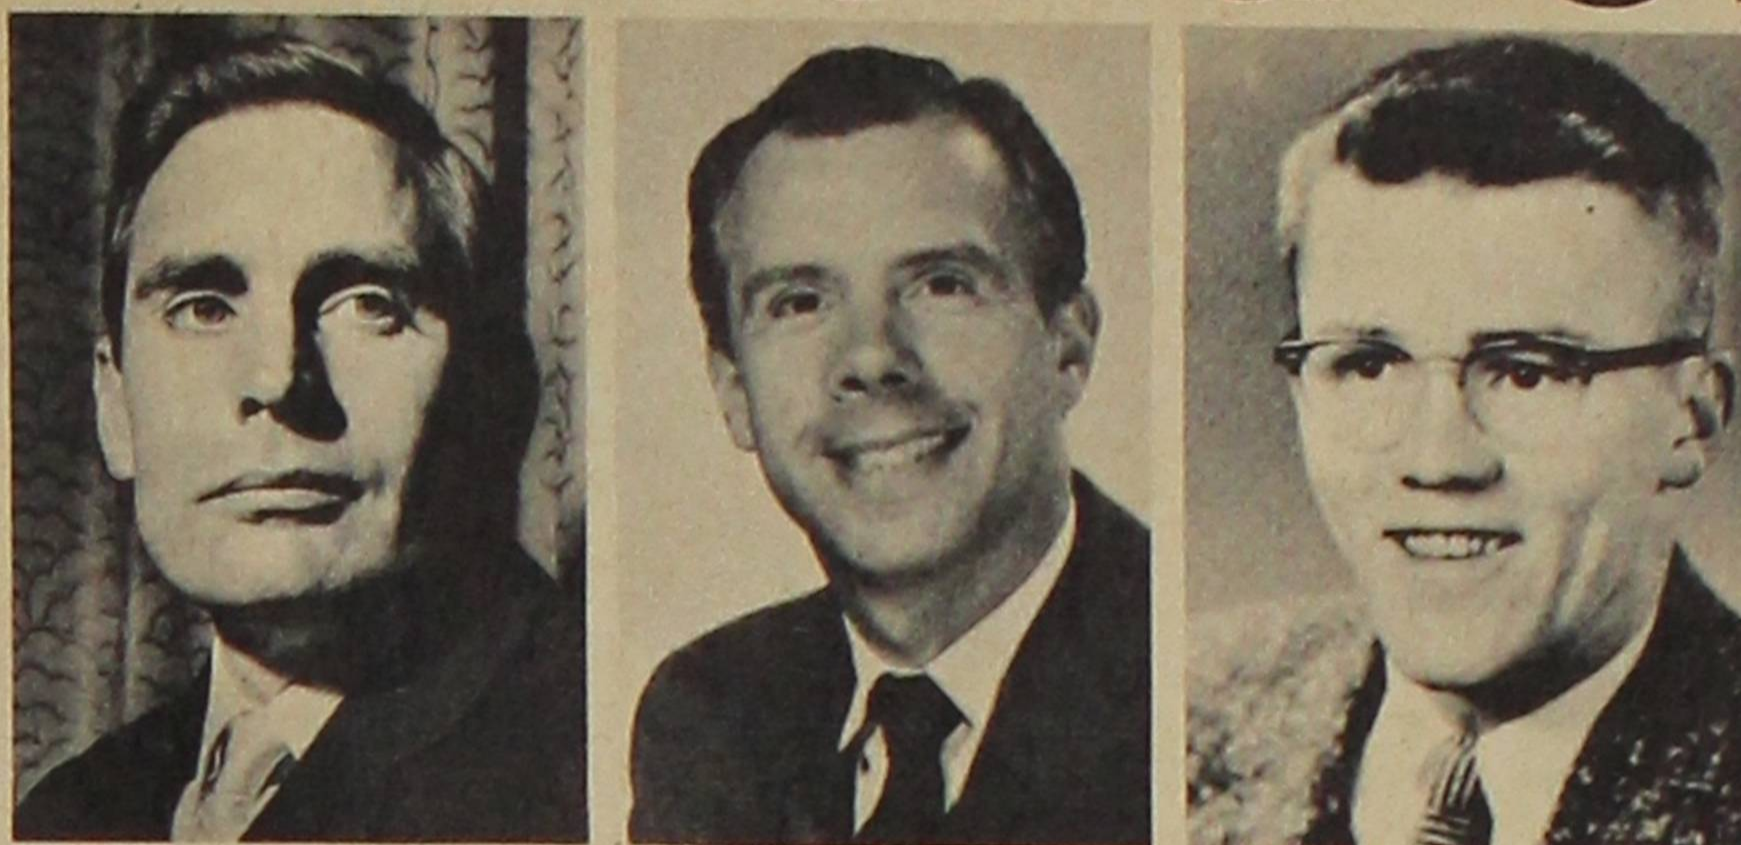

Frederic W. Slee

The appointment of Dr. Frederick Watford Slee as assistant professor of physics at University of Puget Sound is announced by Dean Robert H. Bock. Dr. Slee will begin his duties Sept. 15.

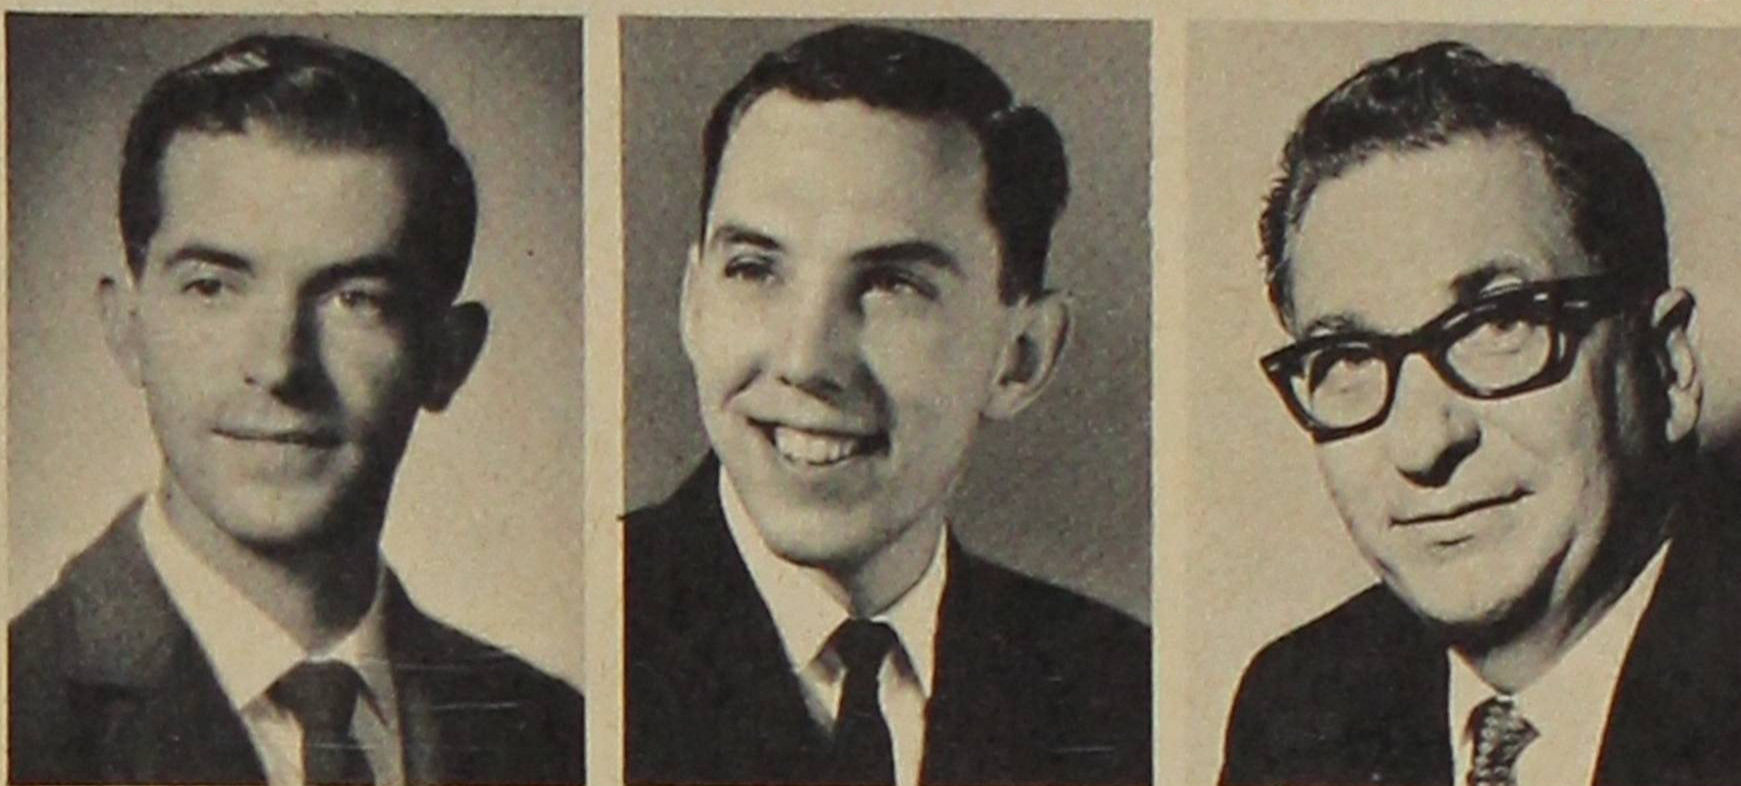

He recently received his doctorate from the University of Washington. His doctoral studies concerned nuclear research involving use of the 42-million electron volt cyclotron at the University of Washington.

Dr. Slee, who received his Bachelor of Science in Physics in 1959 and his Master of Science degree from the U. of Washington in 1960, grew up in Seattle, where he graduated from West Seattle High School.

He is a member of the American Physical Society and of Society of Sigma Xi. He presented a paper entitled, "Reactions on Light and Intermediate Weight Nuclei" at the spring meeting of the American Physical Society in Washington, D. C., in April, 1965.

LEROY ANNIS STANLEY PERKINS EDWARD HERBERT

FREDERICK SLEE EARLE McNEIL THOMAS ANDERSON

Dr. Stanley A. Perkins, Education

Dr. Stanley A. Perkins will join the faculty of University of Puget Sound in Tacoma as assistant professor of education, according to Dean Robert H. Bock. Dr. Perkins will begin his new duties Sept. 15.

A graduate of University of

British Columbia (Bachelor of Education degree in 1959), he received his Master of Education degree from Western Washington State College in 1964 and his Doctor of Education from the University of Oregon in 1966.

He was employed in Victoria, B. C., as a teacher, department head, and counselor before taking a position as graduate assistant at Oregon while completing studies for his doctorate.

Dr. Perkins is a member of Phi Delta Kappa scholastic honorary. He has written a number of works on counseling.

He was born in Jersey, Channel Islands, and he served in the Royal Air Force during World War II. He then migrated to Canada, where he attended UBC. During the summer, Dr. Perkins was a visiting instructor at Bowling Green State University, Ohio. He is married to the former Violet McConaghy, who was born in Chinwangtao, North China. The Perkinses have twin daughters, who are 11 years old.

Wolfred Bauer

Wolfred Bauer is a new addition to the University of Puget Sound faculty. Dr. Bauer will be assistant professor of history beginning with the fall semester.

Dr. Bauer has held a similar position at Seattle Pacific College since 1964. Previous to that he was an instructor, pre-doctoral associate, and teaching research associate at University of Washington.

He attended high school in Bremerton and Bellingham and was a student at Western Washington State College in Bellingham before receiving his bachelor's degree from the University of Washington. He also attended the Dallas Seminary, majoring in theology.

Dr. Bauer is a lieutenant commander in the Naval Reserve and is married and the father of two daughters.

Earle W. McNeil

Earle Winslow McNeil of Pullman has been named instructor in sociology at the University of Puget Sound in Tacoma, according to Dean Robert H. Bock.

McNeil has been a teaching assistant at Washington State University since receiving his master of arts in sociology from that institution in 1965. He received his bachelor of science degree from WSU in 1964. He also attended the University of Idaho.

McNeil was awarded a fellowship as a graduate student by the National Institute of Mental Health. He is a member of Alpha Kappa Delta, national sociological honorary; the American Sociological Association; and the American Civil Liberties Union.

Edward J. Herbert

Dr. Edward J. Herbert has been appointed assistant professor of biology at University of Puget Sound, according to Dean Robert H. Bock.

He received his Ph.D. from Southern Illinois University in Carbondale, Ill., this summer. His major field was physiology. Dr. Herbert was awarded a Master of Science degree from the State University of Iowa in 1959 and a Bachelor of Arts from Cornell College in Mt. Vernon, Iowa, in 1957. His home town is Harvey, Ill.

He was an instructor and teaching fellow at Southern Illinois U. and was a laboratory technician in the department of neurology at State U. of Iowa.

Dr. and Mrs. Herbert have a son and a daughter.

LeRoy E. Annis

LeRoy E. Annis will join the faculty at University of Puget Sound as assistant professor of English, according to Dr. Robert H. Bock, dean of the university.

Annis will begin at UPS Sept. 15 when the fall semester opens. He has been at the University of Washington as a faculty member and adviser since 1960.

He was graduated from Chelalis junior and senior high schools and attended Everett Junior College before graduating from the University of Washington in 1960. He received his master of arts degree from the U of W in 1962.

Annis is a member of Phi Beta Kappa, national honorary. He lives at 2906 No. 25th St. in Tacoma with his wife and five children.

Prentice-Hall has updated reference for anyone who works with words (reporter, editor, proofreader, printer), with A-to-Z fingertip listing in its "Prentice-Hall Word Finder." Listing shows spelling, accent and syllabification of each word. — *Variety*.

There's some question whether anyone should ever work with words.

— *New Yorker Mag.*

James J. Harrison

James Joseph Harrison, who has been instructing at Centralia Community College for the past three years, will join the faculty at University of Puget Sound as assistant professor of mathematics.

Dean Robert H. Bock, in announcing Harrison's appointment, said that he will begin his duties Sept. 15 when the fall semester opens.

Harrison earned his Bachelor of Science degree from Seattle University and his Master of Science degree from the University of Washington in 1962. He returned to the U. of W. last year to begin work on his doctor's degree and to serve as a teaching assistant.

The new UPS professor is originally from Tacoma. His father was owner of Harrison Bros. Construction Co. until his retirement a few years ago.

He lives with his wife and three daughters. His community activities include membership in the Elks.

Henry S. Stokes

Henry Spencer Stokes, Jr., a 1958 graduate of the University of Puget Sound, is a new addition to the history staff here this year.

Stokes attended UPS from 1955-58, receiving a B.A. degree. He then attended Harvard Law School from 1958-60, and is presently working toward a Ph.D. in history at the University of Washington.

Stokes, a native of Seattle, was a teaching assistant at the University of Washington from 1961-63, and served as president of the Phi Alpha Theta fraternity chapter of that university in 1961.

He is single.

Loggers Open Against PLU

An opening game with arch-rival Pacific Lutheran will kick-off the University of Puget Sound football season Saturday, September 17 at Franklin Pierce Stadium in nearby Parkland. The contest begins at 1:30 p.m.

The Loggers will be out to avenge 23-7 and 14-0 defeats at the hands of the Lutherans last season. The Saturday meeting will be the only clash of the year with PLU.

Sixty-five candidates for this year's UPS eleven include 20 lettermen, eight transfers and non-lettermen, and 37 freshmen. The spirited frosh are expected to provide several top candidates for varsity positions.

A pair of all-state prep grads, tackle Kinkela of Tacoma, Mount Tahoma high and fulback Scott McKnight of Walla Walla, have looked exceptionally sharp in early workouts.

Another newcomer, 138-pound Clint Scott of Newport high in Bellevue, may become the greatest placekicker in UPS history. Scott, who is a South African citizen, kicks soccer-style and set a Kingco League record of 22 extra points in addition to a 35-yard field goal in high school last year. He has been splitting the goal-posts regularly in practice sessions.

All-American candidates Joe Peyton, already established as the greatest pass-receiver ever to wear the Maroon and White, should give the Loggers added offense in 1966. Peyton was sidelined most of last season with a broken leg.

All-Conference tackle Jim DiStefano broke his arm in early drills and will be lost to the team for at least four weeks.

The Loggers hope to snap a 16-game winless streak in their opener and win their first game ever at Baker Stadium in a September 24th clash with Central Washington.

UPS led the Evergreen Conference in defense last week but failed to win a game in eight starts despite three ties and a 13-12 loss in their final game of the year.

The schedule: (home games begin at 1:30 p.m.)

Sept. 17 - at Pacific Lutheran

Sept. 24 - Central Washington here

Oct. 1 - at Whitworth

Oct. 8 - Eastern Washington here

Oct. 15 - Lewis & Clark here (Homecoming)

Oct. 22 - Oregon College here

Oct. 29 - at Western Washington

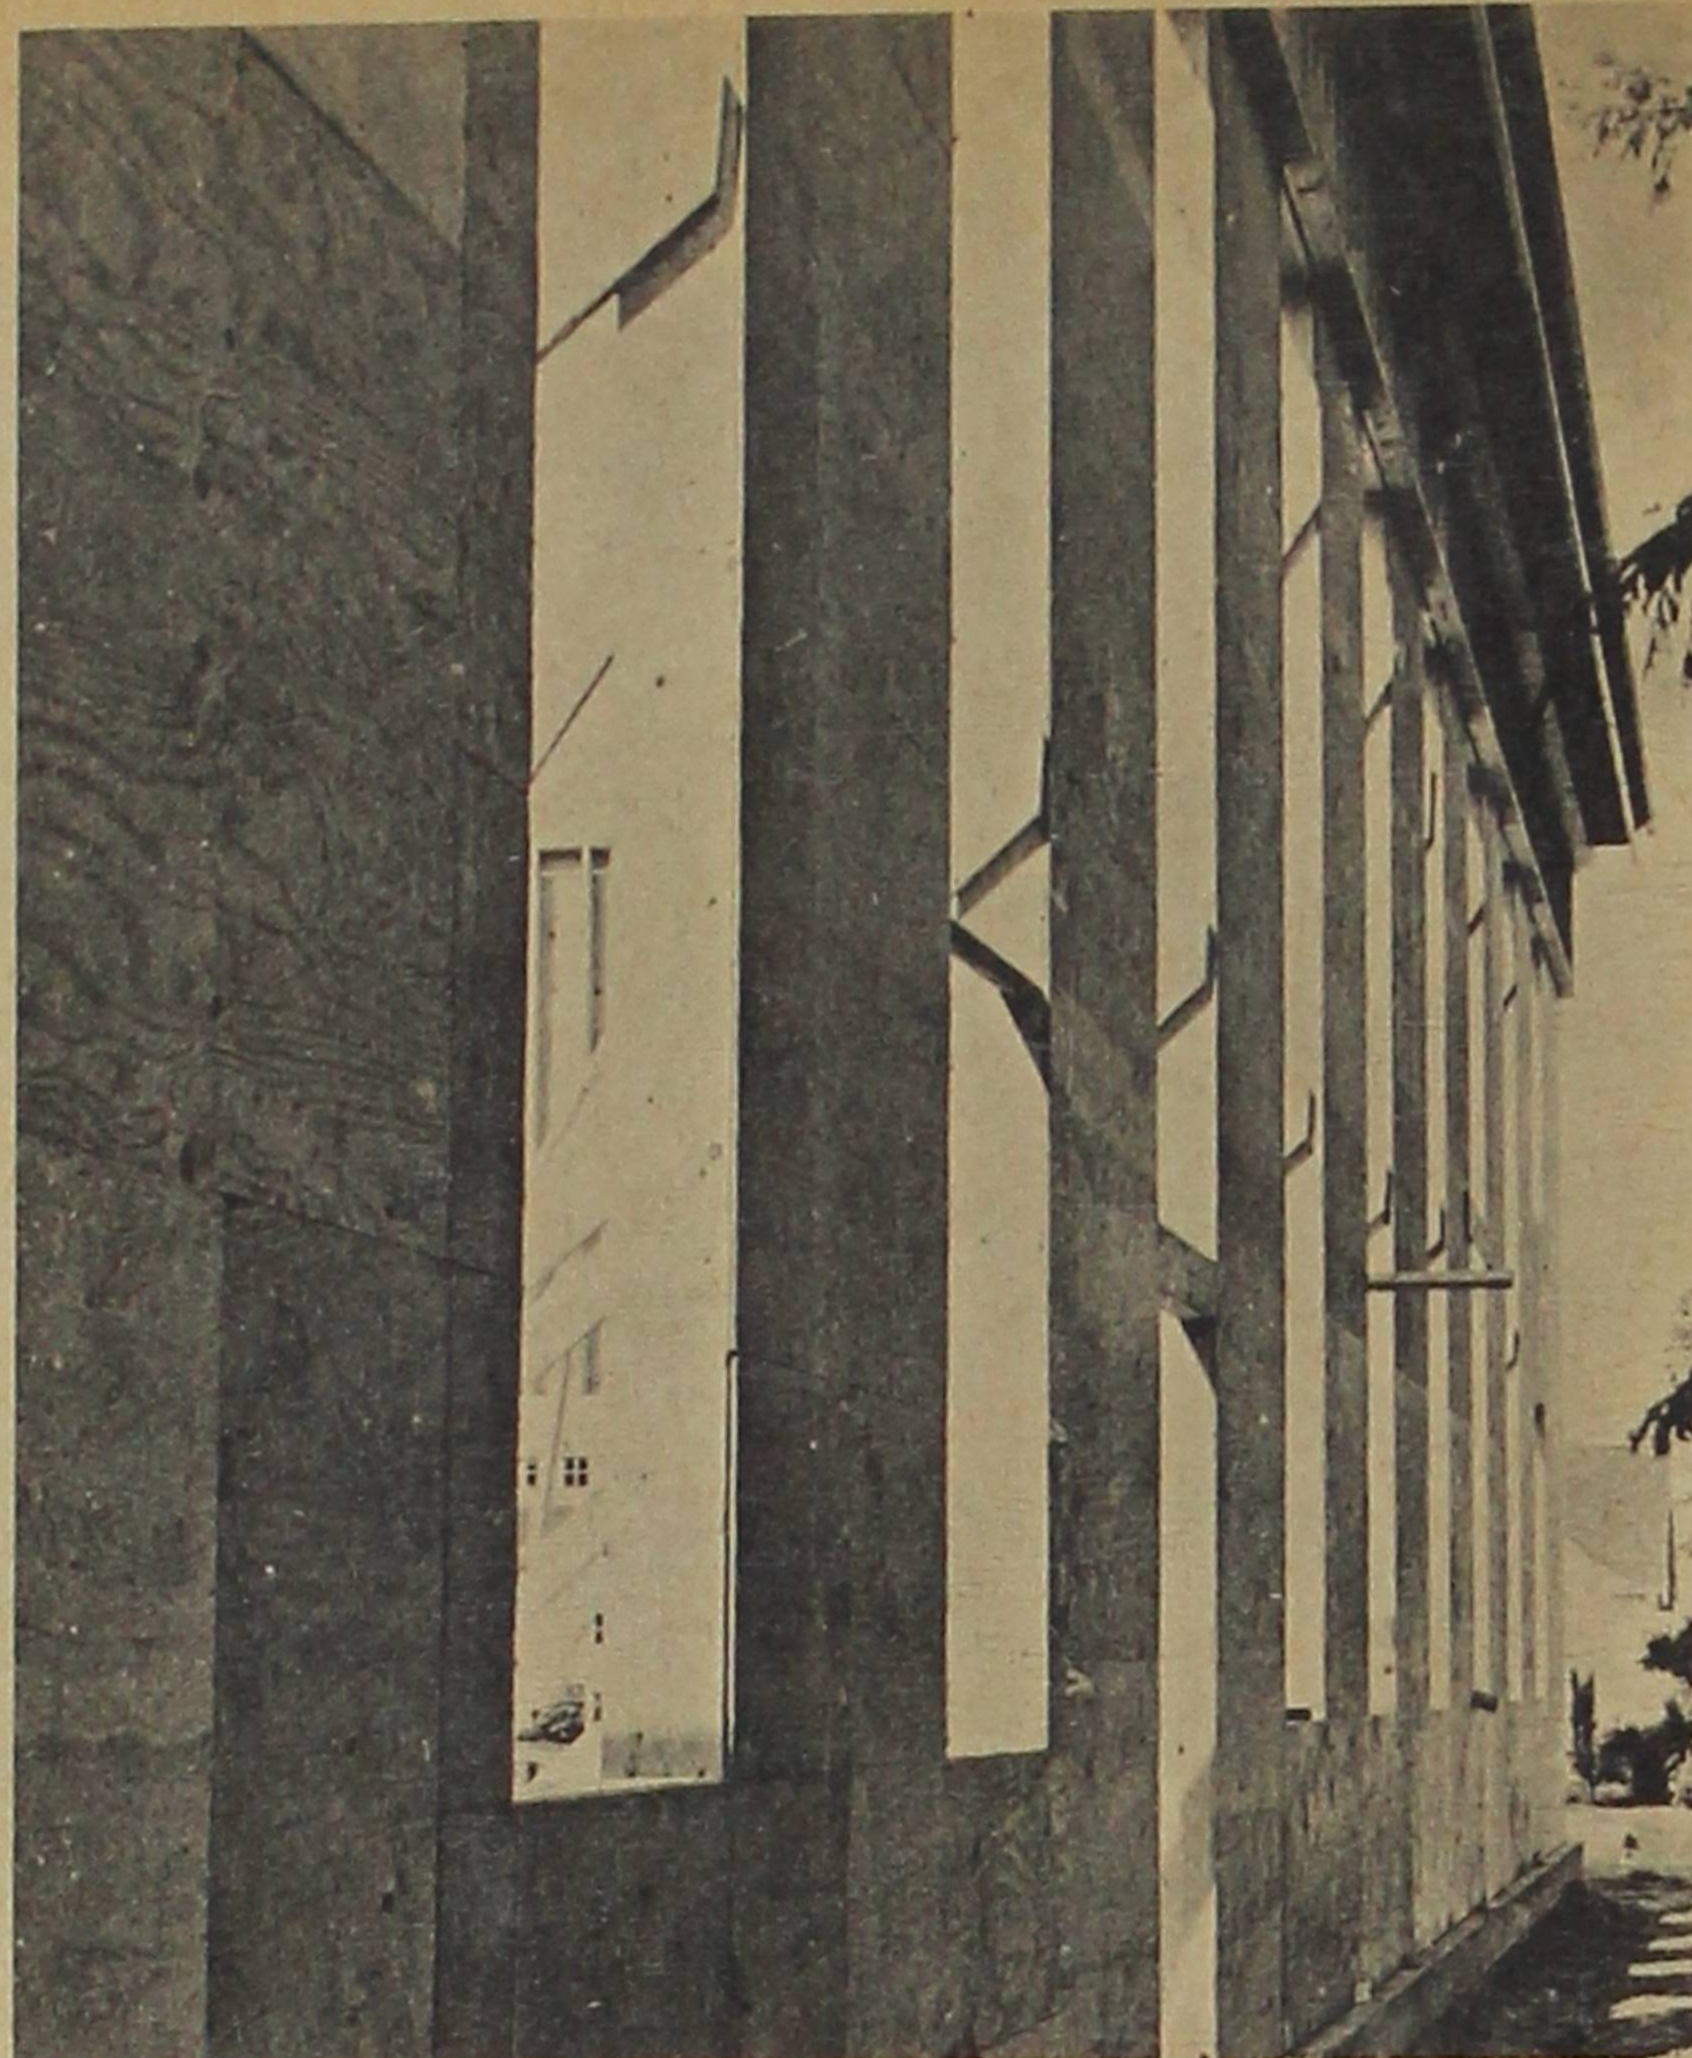

Nov. 5 - at Central Washington

Nov. 12 - Whitworth here

ICE CUBES FOR RENT

—New York Mag

NEW UPS CHAPEL—under construction between N. 18th and the library, will cost \$250,000, \$200,00 of which was bequested to the university, and is expected to be completed before January. Seating capacity will be 300.

Communications, Alias Journalism, Moves to B. A.

An expanded program in communications will be offered at the University of Puget Sound starting this fall, Dean Robert H. Bock announced recently.

A total of 26 semester hours in course work will be offered in the 1966-67 academic year, he said. This will involve six courses, some of them offered more than one time.

Journalism and communications courses now in the catalog are being consolidated under the School of Business Administration and Economics. Journalism has in the past been part of the Department of English.

Communications will first be offered as a minor of 15 hours for

university students in general and as an area of specialization in the new curriculum in Business Administration and Economics. The possibility of a major in communications will depend on university direction and student interest, but may be considered later, the dean said.

Courses will be offered during the coming academic year in news writing, news editing, business communications, advanced news writing, advertising, and history of mass communications.

Dean Bock said the courses will be taught by Asst. Profs William R. Lindley and William G. Orthman, both with extensive careers in communications. They will prepare students for careers in news reporting and editing, specialized nonfiction writing, advertising, and initial assignments in the public relations field.

Faust Involved In Fatal Accident

Kenneth Paul Faust, University of Puget Sound art major, commercial artist and folksinger, died in July as a result of injuries received in a motorcycle accident in the Tacoma area.

Mr. Faust, well-liked at UPS, was originally from Boston, Mass., which he called his home. His art work is well-known at UPS and around the community. Last year he designed the Tamanawas covers.

Mr. Faust was a finalist in the 1965 student body elections at UPS.

At the time of his death his Senior Art Show was being exhibited here. Several prints and paintings from the exhibition are now for sale through Professor Colby of the art department, all proceeds going to Mr. Faust's mother in Healdsburg, Calif.

91 Students in August Ceremony

Ninety-one graduates received degrees and certificates at summer commencement exercises held in August at the University of Puget Sound.

The principle address was delivered by Dr. John Barfoot Macdonald, president of the University of British Columbia. He cautioned graduates that "a college education does not confer instant wisdom on its possessor."

Dr. R. Franklin Thompson, UPS president, awarded the degrees.

A bachelor of fine arts degree was awarded posthumously to Kenneth Paul Faust, who died in a recent traffic accident.

COMING ATTRACTIONS

Sept. 12—Mon.

10 a.m. — Honors
8 p.m. — Freshman Dance

Sept. 13—Tues.

8 a.m. — Opening Orientation Session, Class of '70
Seniors and Graduates Registration

9:45 a.m. — "The Freshman Year" — Dr. Smith, Dr. Ostransky

10:45 a.m. — Faculty - Student Discussion Groups — Assigned Rooms

1 p.m. — ASB Freshman Orientation Session — Jones Hall Aud.

1:30 p.m. — ASB Organization and Club Discussion Groups — South Dining Hall — Student Center.

2:45 p.m. — Freshman Spirit Rally—Baker Stadium

4 p.m. — AWS Reception — Jones Hall Aud.

7 p.m. — Faculty Administration Reception, Class of '70— Student Center Lounge

Sept. 14—Wed.

Juniors, Specials register in afternoon

9 a.m. — "Academic Climate at UPS"—Jones Hall Aud.

11 a.m. — Town Hall Meeting — Jones Hall Aud.

1:30 p.m. — OPI Testing — South Dining Hall, SUB

2:30 p.m. — Freshman Watermelon Bust—Women's Intramural Field

6-8 p.m. — AFROTC Corps Staff Meeting—Major Olson's home

7 p.m. — Foreign Student Reception—SUB Lounge
Junior Class Testing Session

Sept. 15—Thurs.

8 a.m. — Classes begin

10 a.m. — Freshman Convocation Matriculation — Fieldhouse

Sept. 16—Fri.

8 a.m. — Campus Film—Jones Hall Aud.

9:30 p.m. — All School Mixer — South Dining Hall, SUB

Sept. 17—Sat.

1:30 p.m. — Football — UPS vs. PLU — Franklin Pierce Stadium

8 p.m. — Freshman Spirit Program — Jones Hall Aud.

Sept. 18—Sun

12 noon - 2:30 p.m. — Religious Orientation Banquet — Snack Bar Section, SUB

3 p.m. — AFROTC All Corps Picnic

Sept. 21—Wed.

6 p.m. — Phi Delta Kappa dinner meeting — Faculty Dining Room
