

TYRO TOURNEY UPS is first four times

The University of Oregon won the sweepstakes at the UPS Tyro Forensics Tournament Saturday in Tacoma.

The winning team took three firsts in debate and three in individual events. Although the tournament offered competition senior events also, only tyro events were counted toward the sweepstakes score.

University of Puget Sound took firsts in four events and Pacific Lutheran University took one first place in the competition, which included 26 colleges and universities from Oregon and Washington.

More than 300 students participated in the event.

Winners of the various divisions are:

Men's oratory: Dixon Rice of UPS; women's oratory, Sandy Smith of Seattle Pacific; senior oratory, Grogan Robinson of UPS.

Men's extempore: Dave Anderson, U. of Oregon; women's extempore, Susan Tungate, U. of

Oregon; senior extempore, Lynn Still, PLU.

Men's oral interpretation: Tom Thompson, Portland State College; women's oral interpretation, Carolyn Ogden of Gray's Harbor Community College; senior oral interpretation: Ted Raymond of UPS.

Men's impromptu speaking, (first place tie) Tim Davis of Lewis and Clark and Alan Kiest of UPS; women's impromptu speaking, Becky Nobles, U. of Oregon; senior impromptu, Malcolm Higgins, Whitman College.

Men's debate, (first place tie) U. of Oregon, Steve McLaughlin and Greg Mowe and U. of Washington, Mike Downey and Warren Sharpe; women's debate, (first place tie), U. of Oregon (two teams), Becky Nobles and Starla Banta; Roxie Merrell and Susan Tungate; senior division, Lewis and Clark, Roger Ferland and Jim Foster.

Teams from Lewis and Clark, U. of Washington, Centralia Community College, and UPS tied for second place in men's debate.

Store sale-ing discountingly 5000 times

Close to 5000 books will be on sale in the upstairs Bookstore March 1 and 2 at a discount of 15 per cent.

Mrs. Berry, manager, said that this will be the fourth annual book sale and, "So much of it is brand new stock."

Novels, drama, literature, science, philosophy, history, and Cliff Notes Study Guide are the different ones included in the sale.

The sale is only for two days and the Bookstore is open from 8:30 a.m. to 4:00 p.m.

photo by gary emmons

ANGEL WINGS and military steps will be heard in great numbers this weekend as the Arnold Air Society and the Angel Flight will host the weekend's AFROTC area conclave. Faith Claypool will be competing against girls from the ten area schools for the Little Colonel title and the right to represent this area nationally. The University Co-ed Colonel competition Saturday will be among Miss Claypool, Anne Bise, Patty Mason and Gay Brazas. "Moments in Blue" the Military Ball, highlights the convention.

BOARD UP FOR GRABS NEXT WEEK

Student body officers' turnover begins next week as primary elections get under way Thursday and Friday.

Campaign signs, election posters and personal handclaps all point out that new officers will soon be running the show.

Next week's Trail edition will

Today is the last day to drop a class without grade responsibility.

carry statements from candidates for ASUPS president, 1st and 2nd vice presidents, secretary and Central Board delegates.

The candidates' banquet, and question and answer period, will be Tuesday, Feb. 28.

Final elections are Tuesday and Wednesday, March 7 and 8.

photo by bruce kellman

CENTRAL BOARD members hash through an issue they may never settle. Next week's elections will find new faces in familiar board places. Seated (l-r) are Cookie Riutta, secretary; Bill Brown, president; and Marcia Burdette, 1st vice president, standing.

Gap-filling the grade

Our University needs a change in its grading system. Whether we like it or not, grades are an important part of university learning. The merits of grading on a pass or fail system are not the question. The question is whether or not current methods present an accurate indication of a student's classroom efforts. The answer is that the University grading schedule should be changed.

Currently, Puget Sound grades with the usual A, B, C, D, or F with the standard grade points of 4, 3, 2, 1, or 0 assigned. This method is unfair to students, faculty, prospective employers and graduate schools because it can not present a clear, accurate picture of how a student performs academically as an indication of how he might succeed in business or advanced work. Most certainly it is unfair to students.

This hypothetical, but quite plausible, situation could occur. In a particular class, one student averages 2.51 for the course. Because the number is above the lowest class limit for a "B" grade, he gets that mark. Another student earns a 3.49 grade point average for the same course and he, too, receives a "B" grade, the grade to which he is entitled with our current grading system.

The fault in the current system is that there exists almost one full grade point difference in their work, yet both are graded identically. Is this a fair grading system? Hardly.

The student who just made the lower limit was overrated. And the other student, doing better work, was not given a proper mark.

The current marks method is faulty because it allows a student (and there are

some like this) to squeek by the line to a higher grade while his colleague is not honored.

A solution to this inequity might be found with a grading method used at Boston University.

Grades are lettered and numbered.

A = 4.0	C = 2.0
A- = 3.7	C- = 1.7
B+ = 3.3	D+ = 1.3
B = 3.0	D = 1.0
B- = 2.7	F = 0
C+ = 2.3	

This system is more fair and honest than the Puget Sound idea for three reasons.

First, it allows a student who does B+ work to be graded accordingly. Likewise, the eastern school's schedules does not give graded credit where none is due.

Secondly, the breakdown of marks (B-, C+, C, etc.) is superior to a numerical dispersion of 2.1, 2.2, 2.3, etc., because a student would put more into bridging the gulf between a C+ and B-, with accompanying grade points, because the marks had meaning. What student would work that much extra, to raise his gpa in a class from a 3.3 to 3.5 when the resultant reward is negligible?

Of equal importance is the fact that the Boston table permits an instructor to more fairly evaluate his students' performance.

As opposed to the channeled A, B, C, D pattern, the Boston method presents a more accurate and discernable indication of academic endeavors, for whatever purpose it may be used.

Since grades are evaluated by employers in business and industry and by graduate schools as a possible indication of how one might perform for them, lets present a fair, honest, and clear picture for those who want to view it.

let's forget about it?

Hullo, voter.

We're having ASUPS elections in a week.

There're lots of candidates and posters and neat political things like that bidding for our ballots.

But we don't care, voter. We don't care.

Student government is a farce, isn't it?

Of course it is, and so are elections and candidates and posters and voting machines.

We don't care who wins, voter, because they won't be our friends after the elections anyway.

We don't care what happens to our student fees and our student go-between with the administration and our student integrity.

We don't give a damn, voter.

Let's forget about it and find out who's having a party.

LETTERS TO THE EDITOR

I recently had the opportunity to read an article written in the University of Oregon daily student newspaper concerning the faults of fraternities there as well as in other parts of the nation. While flagrantly disagreeing with some points and agreeing with others, the though crossed my mind that perhaps it might be useful to paraphrase pertinent parts of the article and add some comments of my own in the hope that it will cause somebody somewhere to defend his position, whether he be independent or Greek.

There are a few basic issues with viewpoints both for and against fraternities. One of these issues which is frequently aired against fraternities is that "all frat men are the same." To this statement I admit that from what I have heard, fraternities select their men during rush on the basis of how well they will integrate into the group. To me this only seems logical, for to choose a man who did not have anything in common with the group would only breed unhappiness and dislike for both the individual and the group. An individual would also choose his close friends on the basis of what they had in common with each other. Therefore, I cannot see why this particular aspect of a fraternity system should be so repugnant to people.

Secondly, it is often argued that people join a fraternity be-

cause they are immature, weak spined, and are unable to stand up for themselves. This is a gross generalization which cannot possibly be applied to the majority of fraternity members. Granted, there may be a few isolated cases but I can only feel pity for those to whom this applies.

To be trite, "you get out of school what you put into it." If a student desires nothing more than a quietly slip through life unnoticed, then I would say that he could accomplish this possibly more easily as an independent since demands and responsibilities are minimized and a greater degree of anonymity is possible.

With this argument, one often hears that a fraternity is incapable of producing positive qualities such as leadership in its individual members. To this, I would only say that at UPS, how many times has a fraternity man been president of the ASB? One may say that Greeks will naturally vote for another Greek over an independent no matter who is the better qualified. I submit that the independents also follows the exact policy. The voting strength of the Greeks is by no means dominate in elections either since for the last two years in a row, this school has had an independent first vice-president.

It is truly unfortunate, however, that the social activities tend to favor Greeks far more than independents. This situation (see next page)

BETCHA CAN EAT JUST ONE!

Shakey's famous Giant Pizza is enough for a whole family. 'Course, then you'll start singing happy music to Shakey's ragtime piano and banjo... wet your whistle... have fun... work up another appetite. And BINGO!—you're at it again. Maybe you can eat two at that!

Grad testing for seniors coming again

This is to inform you of the times and places of the GRADUATE RECORD EXAMINATIONS for all seniors who are finishing requirements in June, 1967.

The examinations for this group will be held in Jones Hall Auditorium as follows:

Tuesday, March 7 — 1:00-5:30, Area Test

Wednesday, March 8 — 8:00 - Noon, Advanced Test in the major field

Thursday, March 9 — 9:00 - Noon, Aptitude Test for students going on to graduate school

Registration blanks must be filled in and returned to my office, Jones Hall, Room 113, by February 15.

There is a fee of \$4.50 for the Area and Advanced Tests, and an additional fee of \$1.50 for the Aptitude Test if taken at the same time. This should be paid at the Cashier's window prior to the examination date.

Robert H. Bock

Sisterly pen-pals

Dec. 23, 1966

Associated Student
University of Puget Sound
Tacoma, Washington
USA

Dear Sir,

During the times of 1966 we are much sorry not to be sufficient to exchange communications. This is why there brought up the problems of human relations within our former executives. This December's elections made new executives of Kita Kyushu University in stead of the former members. You know, the term of the executives is one year, from December to November. We, all the members' heart is burning with the fight to make vast efforts to communicate more than ever in order to strengthen friendship between UPS and KKU.

Let me introduce ourself. Our chairman of the executives is Mr. Y. Tashiro. The persons in charge of cultural exchange are shown as this? Mr. A. Tsuboshima, head of international compartment; Mr. S. Ochiai, vice-head of international compartment; Mr. S. Ochiai, vice-head; Mr. N. Shoji, vice-head. These three members belong to our honorable ESS (English Study Society) Club. Please continue your favors toward us.

We, the executives are going to plan to send a student studying abroad there to UPS in next September of possible. To aim it, we have too many, too important matters. As before said, there are many students in KKU who do not know of the cultural exchange between our two universities fataly because of awkwardness of our former executives. Then we have an urgent need to diffuse our students more interests in UPS. To carry out this difficult, essential matter, we plan to make an exhibition of UPS. But we have not enough documents for it. If possible, please send us any documents. According to the speeches of Mr. Sugimoto, the former student studying abroad, there is a matter in securing expenses there in UPS where he studies. On this point if you have new idea, please tell us.

Now in KKU a new building has been built one after another. Then our executives are thinking about the trees around the new building. If you can find proper trees there, please show us.

We rely on your further kindness.

Yours truly,
Mr. A. Tsuboshima
Associated Student
Kita Khushu University,
Kita Kyushu, Japan

P.S. Thank you very much a nice Christmas card.

letter continued, continued, continued from page 2

seems to be fairly universal on most campuses but is especially true at UPS where independent living offers little in the way of planned, group functions. This might possibly be an area of student concern and ASB action.

Of all the agremments launched against fraternities the most often heard is that Greeks are indifferent to campus activities. This is primarily a pet complaint of the faculty. It seems to me that the lack of participation in campus activities such as lectures, discussions, debates, etc., is not due to indifference but rather to the lack of communication between the SUB and "those big houses" average.

I do not believe, however, that fraternity living creates the en-

vironment which is conducive to on Union St. I question the number of daily "Tattler" copies that finally get across Union and into the Houses. Obviously, if those students living in these houses are unaware of the activities going on, especially the ones during the week, their not going to attend them. Therefore, if we're going to see an increase in Greek turn-out for these events, we've got to improve communications to the Houses.

Contrary to "popular" belief, fraternities do not nurture scholastic indifference. If this were the case, the Greek men's academic average would not be consistently higher than the all-men's effective learning. Living with approximately fifty or sixty

other "brothers," it is far too easy to formulate patterns of existence which suffocate the learning and to seek out the new deside to question what one is learning and to seek out the new learning experiences such as a play, opera, movie, etc. There is too much of this patterned behavior which continually provides an alternative.

Therefore, it is up to the individual to make the choice of whether he is to study and learn from the education which presents itself to him or be stuck in the "culture-lag" existence which is so easily accessible to the fraternity man.

Steve Hicks
Soc. '69

Examining produce in an open-air marketplace in Lisbon is one way to broaden one's knowledge of the ways of the Portuguese people. These girls found exploring the markets of cities around the world a relaxing change from studies undertaken last year during a semester at sea on Chapman College's floating campus.

Alzada Knickerbocker of Knoxville, Tennessee,—in the plaid dress—returned from the study-travel semester to complete her senior year in English at Radcliffe College.

Jan Knippers of Lawrenceburg, Tennessee, a graduate of the University of Tennessee, and a former Peace Corps Volunteer, first pursued graduate studies in International Relations and returned a second semester as a teaching assistant in Spanish on the world-circling campus.

The fall semester voyage of discovery, aboard the s.s. RYNDAM, for which Holland-America Line acts as General Passenger Agents, is carrying 450 other students to ports around the world as you read this.

Still another 450 will leave from Los Angeles in February for the spring 1967 semester set to transit Panama Canal and call at ports in Venezuela, Brazil, Argentina, Nigeria, Senegal, Morocco, Spain, Portugal, The Netherlands, Denmark and Great Britain, returning to New York.

For a catalog describing how you can include the spring semester aboard the RYNDAM in your educational plans, fill in the information below and mail.

They write: war, critics, project, sports

To the Editor:

I wish to express my support for the eighteen UPS faculty members whose statement appeared in the Tacoma News Tribune on Jan. 17, calling for cessation of bombing in Vietnam and pursuit of a negotiated settlement.

The statement which appeared in the News Tribune on Feb. 3, signed by some 80 UPS faculty members, calls for a reply.

The four points outlined in the statement are presented as facts. They are one interpretation, and not necessarily an objective one, of the present world situation. Although some variations of this interpretation is widespread in the United States, many of the world's people's have a different view of the present world political situation and of American involvement in Vietnam.

A different view was expressed by the noted Swedish social economist Gunnar Myrdal in a speech given to a Human Rights Day rally at Madison Square Garden, Dec. 8, 1966.

Mr. Myrdal said that "the

American Government is increasingly entering into a political and moral isolation . . . It is, in particular, the war in Vietnam that has caused the world to disassociate itself from official American policy . . . Today America's involvement in the Vietnam war is to the world at large the main indication that the American government is going wrong in its attempts to 'police' the globe on its own terms."

Mrs. Dorothy A. Burkhart
11508 Tower Road, S.W.

don't hedge

I did not say the questions, debated at the "House of Critics" should be submitted to the administration to decide (and neither did anyone else). I said, in view of the existing conditions at UPS the question should have been addressed to the administration rather than the faculty. As has been pointed out, faculties, which are expected and/or encourage to publish, work under very different conditions than those which exist at UPS. It is possible that these conditions result because we are not a state supported school, or because the building program comes first, or any number of reasons but, the fault does not

lie with the faculty.

I have a few suggestions before choosing a subject for the next debate:

1. Try and uncover the specific situation on this campus if the question specifically deals with UPS activities academic or otherwise.

2. Try to find out where, or with whom, the responsibility for the situation actually exists.

3. Go to the responsible party or parties and attempt to get the true reason for the existence of the situation.

4. Then compose the questions.
5. Direct it toward the responsible party or parties.

6. Don't hedge.
Good Luck.

Jerry Reynolds

loggers spirit

Dear Editor:

On behalf of the athletic department and UPS basketball team I want to thank the student body for its enthusiastic support of the program this season, particularly in the final home games of the past two weeks.

School spirit usually depends on winning seasons but the students at UPS resounded in greater numbers than ever before at the Seattle Pacific and Central Washington games despite a losing season.

Monday night's example of school pride nearly carried the UPS team to victory over a Central Washington team which has a 21-3 record on the season. The Loggers played an inspired game and much of the credit must go to student support.

The Chips, Choppers, fraternities and sororities, IFC, and the Lettermen's Club should be given credit for fostering and generating that spirit.

It was particularly gratifying to have so many of our alumni and other fans from the community comment about the display of student support. Many prospective athletes from the Tacoma area also were in attendance and most of them anticipated a one-sided game. To say they were impressed by Logger spirit would be an understatement. You can't imagine how important this impression can be to our coaches in their efforts to interest top student-athletes in our program.

We are proud to share your pride in a basketball team which may have lost more than its share of games but never once stopped

Editor:

At its February 6 meeting the Faculty Senate unanimously voted to commend this year's Sophomore Class for its School-to-School project, started last year. In speaking for the Senate, I extend this commendation to the sophomores. And to the rest of the student body, I'd suggest you look at Sunday's Tacoma News Tribune (Feb. 5) and read an exciting account of how this UPS project in Brazil has meant a new school for the Boa Vista villagers.

Dr. Harold Simonson,
Chairman
Faculty Senate

Colleges get Reed-style scrutinizing

"The American College: Reflection of or Reaction to Society?" is the theme of a conference to be held March 3-5 at Reed College. The conference will take a critical look at the American college.

The conference is sponsored by the American Friends Service Committee, and Lewis and Clark, Portland State and Reed Colleges.

Students and faculty from colleges throughout the Northwest are invited to participate in the conference. Laymen and young people of college age are also welcome to attend.

Included among the speakers are: Saul Landau, writer and co-author of THE NEW RADICALS; Paul Potter, past president of the Students for Democratic Society; James Weinstein, editor of STUDIES ON THE LEFT; John Howard, president of Lewis and Clark; Branford Hillar, president of Portland State; John Dudman, dean of students at Reed; Arthur Pearl of the University of Oregon, and Alex Gottfried of the University of Washington.

trying against the toughest of opposition.

The Hammonds, Whitsells, Sissons and other underclassmen are eager for next year and the year after. Give them your support again and you will be cheering for a winner.

Thank you for your interest and your efforts.

Doug McArthur
Sports Publicity

Globetrotters living it up on continent

Twenty-seven UPS students and members of the faculty are now touring London, Paris and Rome on their way to Vienna.

They are all participants in the UPS semester abroad program.

Leaving from Sea-Tac on Feb. 1, they flew directly to London for a six-day tour. There everyone seemed to enjoy riding the tube.

They also saw "Robert and Elizabeth" the story of the story of the Brownings, and were amazed that people in the audience would clap and cheer after every song and scene.

Many were reminded of Mary Poppins because of all the chimneys—every house had three or four.

The next stop was Paris where one night most of the students got up at 2 a.m. and walked to the market place les Halles where people go after the theater and night clubs to have onion soup.

Then they tramped around through the open meat markets and saw a Picasso exhibit.

When the students reach Vienna, they will have the following classes taught by Dr. Tomlinson: Recent European History, Classic and Romantic Music, German, and Arts of the Northern Renaissance.

Classes may also be arranged for at the University of Vienna.

UPS students in the program include Gracia Alkema, Bonnie Brooksbank, Val Brustad, Sue Cray, David Crutcher, Linda De Young, Paul Fish, Ann Fitzgerald, Alice Ann Glenn. Also Scott Griswold, Betta Jo Hay, Russell Heald, Teres Jensen, Julie Jueling, Ruth Keller, Diana Kingsley, Marlene Kofoed, Larry MacLaren, Aileen McClurg, Randall Melquist, Margie Miller, Sandra Mostoller, Robert Nelson, Diana Rippeon, Suzanne Scherdin, Lynda Walter and Richard Watson.

Dr. Thompson speaks freely at chapel

The Chapel service next Thursday, March 2, will be conducted by the President of the University, Dr. R. Franklin Thompson, who will speak on "Freedom of Choice."

This will be third of the monthly "Freedom Series" of Chapel services.

Basing his talk on a line from a poem by Longfellow, Dr. Thompson will deal with the problem of freedom of choice as it affects the student.

The university student today finds himself with the freedom of choice and the responsibility for his choices.

Chapel will be held at 10:00 in Kilworth Memorial Chapel.

These U.S. Air Force officers are getting what they want out of life. You can be one of them.

What are they doing? They are performing a job of importance. Hour after hour. Year after year. Many of them will serve for 20 or more years. The fruitful part of a man's life. Will yours be fruitful and creative? Or just spent?

You're going to college to do something constructive, important. And you can be sure of it, in the U. S. Air Force.

Start now in the Air Force ROTC program on your campus. Your Professor of Aerospace Studies will explain the variety of career opportunities. Pilot. Navigator. Engineering. Science. Administration.

If you get in on it, you get paid to be part of the most exciting technological breakthroughs of all time. You'll become a leader, an officer in one of America's most vital organizations... the U. S. Air Force.

You can be part of the Aerospace Age when things are most exciting... at the begin-

ning. While you serve your country, the whole universe will open up to you.

There's a 2-year Air Force ROTC program, and the 4-year program has new attractive scholarship provisions.

Lots of men waste their working years. But you don't have to be one of them.

Income tax advice offered

For the convenience of Tacoma area taxpayers, the Internal Revenue Service will provide taxpayer assistance service on Saturdays as well as weekdays starting February 4 and continuing through April 15.

The Tacoma IRS office at 1305 South Tacoma Avenue will be

open Saturdays from 8:15 a.m. to 4:45 p.m. to answer, by telephone and in person, questions that taxpayers have on their federal tax returns.

The experience of the Service has been that most questions can be answered by telephone, MA 7-9182.

\$25 covers it

Somebody in the Tamanawas office is troubled. He's Editor Bruce Kellman and the problem is that the 1967 yearbook has no cover.

Trying to follow a publication like last year's is rough. Of the 6,000 yearbooks published last year, the University of Puget Sound annual had the only one with individual cover paintings.

So, beginning today Tamanawas is sponsoring a contest to design a cover. The cover competition is open to full-time UPS students.

Last year Doug Smith, the late Ken Foust and Lynn Johnson arranged for our sister university in Japan to provide the rice-paper drawings for the annual.

For the \$25 prize for this year's cover, Kellman wants any kind of design, woodcut or drawing that can be reproduced with the cover color plus one applied color. Simplicity of design, appropriateness of campus scene both count.

Since designs must be submitted no later than March 3, contact Kellman in the Tamanawas office for details.

Purdue physics prof new guest lecturer

Professor Rolf M. Steffen, of the Department of Physics at Purdue University, Lafayette, Indiana, will serve as a visiting lecturer at the University of Puget Sound and Pacific Lutheran University, Tacoma, Washington, Thursday and Friday, March 2 and 3.

He will visit under the auspices of the American Association of Physics Teachers and the American Institute of Physics as part of a board, nationwide program to stimulate interest in physics. The program is now in its tenth year and is supported by the National Science Foundation.

The American Association of Physics Teachers is one of the seven member societies of the American Institute of Physics. Other member societies are: The American Physical Society, Optical Society of America, Acoustical Society of America, the Society of Rheology, American Crystallographic Association, and the American Astronomical Society.

Professor Steffen will give lec-

tures, hold informal meetings with students and assist faculty members with curriculum and research problems. Professor B. E. Brown, Acting Chairman of the Department of Physics at Puget Sound and Professor Olaf M. Jordahl, Chairman of the Department of Physics at Pacific Lutheran University are in charge of arrangements for Professor Steffen's visit.

Rolf M. Steffen was born in Basel, Switzerland; received his B.S. in 1943, M.S. in 1945, and doctorate in 1948, from the Swiss Federal Institute of Technology, Zurich, Switzerland.

He was a graduate assistant in the Swiss Federal Institute of Technology from 1945-49 before going to Purdue University where he was an assistant professor of physics, 1949-52, an associate professor of physics, 1952-57, and a full professor from 1957 to the present.

He was the recipient of the Kern Award and Silver Medal in 1949 (Prize for best Ph.D. thesis at the Swiss Federal Institute of Technology), and the Sigma Xi (research honorary) Award from Purdue Chapter, 1964.

Dr. Steffen's special research fields are nuclear spectroscopy, angular correlation of nuclear radiation, and beta decay. He is the author of more than 70 publications in professional journals and his special instructional fields are nuclear physics and nuclear theory.

FOLLOW THE BOUNCING BALL! Sophomore Logger forward Terry Hammond (No. 44) watches the elusive ball helplessly from a ring of Central Washington players. Hammond poured in 23 points as the Loggers were nudged by the Wildcats 83-76. UPS meets PLU Saturday in the Lute gym at 8 p.m.

Where Pride of Possession Is Part of Your Purchase

tomorrow, today EDUCATION: PRIVILEGE OR RIGHT?

What is the relationship of public and private universities? Should the cost of higher education be borne primarily by families of students who benefit most, or should society as a whole bear the burden?

"Is higher education a privilege or a democratic right? The arguments seem much like those of a century ago, when the nation was grappling with the question of free public high schools." This statement from *Time* magazine (Feb. 17, 1967) sums up the questions which will continue to trouble universities in at least the near future.

Public and Private Universities

By some standards, the private university is outmoded. The only advantage it can offer over the public "multiversity" is the communication possible between student and professor.

Private colleges cannot expect to compete with state-owned schools in course offerings as witnessed by the affiliation of colleges and co-ed universities: Radcliffe with Harvard, Barnard with Columbia, Bryn Mawr with Haverford, etc.

Vassar students anticipate a move of their entire campus to New Haven in order to affiliate with Yale. Part of the reason for the move is that Vassar has trouble attracting top professors, especially in math, economics, and science.

Naturally a private college cannot compete with a state university in terms of cost. The public universities in California, Connecticut, Idaho and Kentucky are the few which charge no tuition at all. Those belonging to the National Association of State Universities and Land-Grant Colleges charge about \$333.

The important factor in keeping tuition charges so low is to make sure the schools remain accessible to prospective students in all areas of the economic spectrum.

Junior Colleges

As a result of this generally low tuition, California universities have become increasingly more crowded. Part of the purpose of the new junior colleges to take this load off the universities.

The junior colleges are two-year schools open to anyone 18 or over and charging nominal tuition. They offer an Associated Arts degree. Many students who attend junior colleges for two years transfer to universities which can't always cater to freshmen and sophomores.

Some junior colleges are vocational, some agricultural, and some academic. There are eight in the Los Angeles area alone.

Junior colleges and community colleges seem to provide the answer to the problems of free higher education available to any who want it. The cost of these colleges will be borne mainly by society rather than by the parents of students enrolled there.

The School and the City

Another trend in university education is the connection of the school and the surrounding community.

"Until recently, most urban universities tended to stand aloofly apart from the cities in which they lived," states *Time* (January 6, 1967).

"But the schools' hunger for more land, the traffic and housing problems they create, have sharpened old town-grown tensions—and have also made administrators more conscious of the fact that their institutions may possess the intellectual resources to help create what Hester (president of New York University) calls 'a renaissance in urban life.' . . .

"Universities . . . are creating interdisciplinary departments for the academic investigation of urban problems, and they are setting up field agencies that plunge into practical action to help ease those problems. The two usually mesh."

Harvard, M.I.T., N.Y.U., U.C.L.A., U.C. at Berkeley, U.S.C., and Yale have all undertaken major community service projects.

Students and Administration

How university administration will be affected in the future can only be left to speculation. In state-owned schools there is always the question of whether government or administration will have greater control.

One can at least say the students of the universities will become more concerned about how their schools are run. The firing of Clark Kerr as president of the University of California instigated demonstrations of 7000 students at U.C.L.A., 6000 at Berkeley, 500 at Santa Barbara, and 3500 at Riverside.

Because students are taking a greater interest in their schools, they will probably have more say in future policies of universities in all areas.

h.b. 353: an acid commentary

By John Berg and Bob Sprenger

Earlier this month, State Rep. Thomas Swayze (R-Tacoma) sent a letter inviting the ASB officers and Trail representatives to attend the hearing of this state's Public Health and Welfare Committee, regarding various bills on the use and control of LSD and related substances.

The hearing was attended by students and faculty from 36 universities, colleges, junior colleges and high schools in Washington. A group of UPS students were seated with the student body officers and newspaper representatives of the other schools on

with penalties of \$200 and three months and larger amounts for subsequent offenses.

HB 353, proposed by Rep. Gladys Kirk and others, "amends the existing Dangerous Drug Act which states specifically the drugs which are described as unlawful to disseminate, to include any drug found by federal law or regulation or Washington State Pharmacy Board regulation to have a potential for abuse because of its depressant or stimulant effect on the central nervous system or its hallucogenic effect or any other drug required by federal or state law or federal

not that possession of LSD is illegal.

In the past several years, the number of LSD and marijuana users in Washington, by conservative estimates has increased to more than 2,000, while during the same period large scale prostitution and the use of narcotics has remained at approximately the same level as several years ago.

Litchman received the traditional arguments that no casual connection has been found between LSD-marijuana users and narcotics users; that no harmful physical effects have been found connected with the use of LSD, and other questions regarding the proper or controlled use of such substances. He pointed to the present trend in the Supreme Court decisions regarding drug addicts of any kind not as criminals but as sick people in need of treatment rather than imprisonment.

Litchman was opposed to the classification of LSD along with barbituates, amphetamine, as a dangerous drug. He pointed out that intelligent use of LSD and related substances by adults should be made possible. On the suggestion of Dr. Sidney Cohen of California and Dr. Hoffer of

fully support 353 as it exists since among other technicalities, the federal law does not make possession of LSD unlawful. Dr. Halliday told the Committee that Sandoz Co., the only licensed producer of LSD, upon recognizing the possibilities of the compound, turned over its stocks of LSD and production rights to the federal government.

Since LSD was first discovered in 1938, Dr. Halliday reported that over 2000 professional papers on LSD and related research have appeared in scientific journals. In reviewing many of these papers, Dr. Halliday stated contrary to Rep. Litchman and subsequent authorities speaking, that so far "no therapeutic value has been found that has outweighed the dangers" (with regards to LSD use and research.) Dr. Halliday emphasized that her support of 353 depended on the deletion of clauses referring to the state pharmacists serving without pay are "obviously not authorities" on decisions regarding dangerous drugs.

Dr. Halliday herself has published a paper related to LSD research. She explained that the term "addictive" cannot be used in this context, although "psychological dependence" is indicated.

stitutionality, Spellman advanced one step further: "I believe the federal law if tested in court will fall as it now stands." Spellman strongly objected to the status of the Pharmacy's Board in 353 simply on the grounds of competency. He listed two recent Supreme Court decisions in direct opposition to measures called for in 353.

Most heatedly, Spellman emphasized that since the federal government does not regard possession of LSD unlawful, the adoption of 353 would engender blatant contempt for the law — thousands of students at colleges and universities in Washington would drive LSD underground to a much greater extent than it is at present and that society would lose whatever control it had on the use of LSD. He guaranteed that crimes and violence would be increased, and people would then refuse to seek medical or psychotherapeutic care had they problems with regards to LSD.

An important aspect of the LSD experience is the set or the setting, Spellman said. Making it illegal would merely encourage the type of "bum trips" that result from inappropriate settings. In addition, Spellman could not see

students trip in

the house floor during the hearing which took place from 8 to 10 p.m. on Feb. 9.

After a preliminary briefing session, students had a chance to meet state representatives, many of which excused themselves for a "brief function" at the Tye—later returning at the conclusion of the hearing. The chairman of the committee, Rep. Jonathan Whetzel, had made possible the unique opportunity for the student representatives to be present in the wings of the house floor.

In addition, the committee consisted of six representatives, two members of the State Pharmacy Board, and two representatives of the Wash. State Medical Association.

The bills discussed in the hearing included the following: HB 45, proposed by Rep. Mark Litchman of Seattle, related specifically to LSD. Part of the summary of HD 45 reads:

"Makes dissemination of LSD unlawful except by physicians and surgeons or by pharmacists upon written prescription; permits use of LSD for research purposes by physicians and surgeons and by hospitals, colleges, universities, and the State Department of Health upon prescription showing the recipient of the drug and the person prescribing its use, and requiring that any such prescription be mailed to the State Board of Pharmacy within 60 days after preparation by the pharmacist. In any such research program, the administrator shall report to the State Board of Pharmacy the amount of dosage and the recipient."

Penalties provided begin with a fine not exceeding \$5,000 and a sentence from one to five years for the first offense to a fine not exceeding \$25,000 and a sentence of from ten to forty years for a third offense. In addition, \$50,000 and up to forty years will be the penalty for the sale to a minor in violation of the act.

HB 467 also proposed by Rep. Litchman is similar to HB 45, except the respective penalties are reduced to \$200 and not more than 3 months to \$5,000 and ten years. In addition, possession of LSD by any person under 18 years of age shall be unlawful

regulation." The bill makes no change in the penalties for violation of the act as it exists, which begin at \$200 and/or a sentence of not exceeding six months.

HB 536, also proposed by Rep. Litchman provides for the possibility of providing LSD research centers in Washington for the purposes relative to the treatment of the mentally ill, the insane, the alcoholics, or for such purposes as the development of research should suggest.

Copies of the above bills in full were sent to the ASB by Rep. Swayze and are located in the ASB office.

Speaking to the committee were 15 speakers with various degrees and types of authority on the issues involved. The first speaker, Rep. Gladys Kirk, urged that the legislature give help to law enforcement people and medical authorities by bringing such compounds as LSD under the Dangerous Drug Act. One fourth or less of the representatives were present at the hearing.

Next to speak was Rep. Hoggins, who also urged support of HB 353, who was alarmed at the high level of use of hallucinatory, depressant and stimulant drugs.

Rep. Hoggins indicated that there is no control on such compounds which are connected with extremists such as those proponents of "the drop-out religion" since LSD is easily made in bathtubs and makeshift labs, is easily

.. drop out religion

obtained, and is difficult to detect. Rep. Hoggins hoped that a law would be passed that will give the authorities "a basis for fact" on issues such as the present LSD controversy.

Rep. Litchman noted that Washington's emergency law on the use and sale of LSD is at present unconstitutional and must be made to agree with the existing federal laws. The federal laws on dangerous drugs have been formulated with the aid of dozens of hearings with medical, scientific and legal authorities. After careful consideration, the Congress has passed several laws relating to LSD, one of which is

Saskatchewan, Rep. Litchman also proposed HB 536, which would provide for the establishment of the centers mentioned above.

Next, Mr. Kusler of the state Pharmacy Board explained that the Board consists of three pharmacists working without pay "closely following the procedures of their federal analogues." In support of HB 353, Mr. Kusler explained that the Board added LSD to the states dangerous drug list in November 1965. "Similar substances" also added to the list include lysergic acid (used in the manufacture of LSD, d-lysergic acid diethylamide), mescaline, peyote, psilocybin and psilocin.

Mr. Bennett, Executive Secretary of the Wash. State Pharmaceutical Association, urged sup-

port of HB 353. He asked that the state adopt its own criteria, rather than follow the federal government's position, since the federal laws on this matter are "mainly concerned with interstate commerce."

The next speaker was Dr. Audrey B. Halliday, speaking self-admittedly for ten minutes from her own viewpoint, and for a shorter time for the Wash. State Medical Association. Dr. Halliday, a psychologist at the University of Washington pointed out that HB 353, which she and the Medical Association officially preferred, was designed to include all dangerous drugs. She could not

funny fed friendship...

Dr. Halliday said that "a preponderance of the literature seems to indicate the (LSD) is a dangerous drug." In reply to a question from a committee member, Dr. Halliday admitted that at this time no major authority has said that it is a dangerous drug.

Dr. J. M. Dille, head of the UW Dept. of Pharmacy was next. Dr. Dille first outlined what qualities he thought a good law should have: it should protect citizens and yet guarantee each person individual freedom. A good law should also "provide for the improvement and betterment of society." It should be (in Washington) on line with the federal law. Dr. Dille then proposed that the legislature should simply adopt the federal regulations with regards to LSD. HB 353 he felt was closest to the federal existing statutes with several important exceptions.

Dr. Dille felt most strongly about the Pharmacy Board, who, he suspected, "wants more power" and should not have authority in matters where their competence might easily be questioned. Dr. Dille said that pharmacology can not give forth a realm in which mind expanding possibilities are apparent. Recent studies with LSD and creativity have indicated that LSD and related compounds are not describable in body parameters, "rather, they do something to free the mind."

A long speech by Dr. John Spellman (UW, History and Culture of India) followed Dr. Dille's statements. In opposition to HB 353 and its future incon-

how a law making LSD illegal would in any way help law enforcement agencies.

Since LSD could be absorbed in paper, how could police easily search a person or his home and expect to easily find LSD? Spellman (and earlier Rep. Litchman) indicated that, were LSD to become illegal, that organized syndicates would take over the distribution of LSD, with the possibility of increasing the amount of impure or mixed (with other drugs such as amphetamine or barbituates) LSD being sold.

Several questions were asked of Dr. Spellman by the committee: was not the taking of LSD like driving an automobile, upon which a large number of restrictions are placed? Spellman rejected the analogy as "false and misleading" and proposed his own analogy, that of children playing near the street. When one narrowly missed being struck by a car, we punish the child rather than instruct him before hand, Spellman said.

Spellman's competency was questioned by Rep. Farr of the committee—Dr. Spellman replied that he held the only PhD in North America from the School of Asian Studies in London, that he had studied at Oxford and the Sorbonne, that he was a Ford Foundation Fellow, that he had extensively studied Indian culture and their use of hallucinogens, etc.

Asked whether any positive results could be ascribed to the LSD experience, Spellman replied

(see page 8)

More about LSD

(continued from page 7)

that such questions are the wrong type to ask, since legislation or morality does not always aim at positives where no negatives can be found. He added however, from his own, and other surveys 85% of the people taking LSD have reported that the experience was beneficial. With proper preparation, Spellman was sure that the figures would increase since many "trips" have resulted from improper or little preparation.

Spellman's remarks were briefly reported in the Seattle and Tacoma papers; the **Olympian** favored many issues (mainly logical ones, partially relating to LSD) raised by Spellman.

Next to speak was Mr. C. A. Rouse, Deputy Chief of the Seattle Police Dept. who representing the stand of the department in "drugs, narcotics, or whatever you want to call them." Rouse read a letter by the police force signed by a number of police officials, a King County Commissioner and several other readers indicating a unilateral support of HB 353.

Mr. Ted Sprinkel, a detective on the Seattle Police force, spoke next. He said that there is no way to compile the number of LSD users at present—that state laws against possession are needed to help law enforcement officers. Sprinkel said that the number of "bathtub chemists" (who are committing illegal acts according to federal law) is increasing with the increase in demand for LSD.

LSD became a problem around 1965, according to Sprinkel, because of the exorbitant claims made by researchers "We should stop glamorizing the drug," he said. Asked by the committee on the possession issue, Mr. Sprinkel was uncertain of the advisability in passing a law against possession.

Lt. Wally Seymour of the Tacoma Police force said his department favors the passage of HB 353. The problem warrants local level control, especially with regards to the possession statute which is needed to catch pushers. Seymour also felt that the state Pharmacy Board should have the power to declare any drug or substance dangerous that may be harmful to the public.

Mrs. Ray Barger of Seattle spoke briefly. She related the tragic experience in her own family with relation to LSD and marijuana which separated her from her daughter. Mrs. Barger stated that, "enough has been said of the dangerous of (LSD) by the experts tonight."

The last speaker was a student body officer at Central Washington State College speaking for his school and for Eastern Washington State College students. He said that the situation is rather nebulous and that a law should be passed which allows for "further research and one which allows for control." The two schools support HB 353.

After the adjournment of the hearing, the newspaper represent-

atives of the 30-odd schools were allowed a brief question or two of the Welfare Committee. Conceptual issues were not involved; minor issues were defended or exaggerated.

Although there was no explicit indication by Chairman Whetzel or Rep. Kirk that HB 353 will have to be altered before it is voted upon, various newsmen indicated that the bill may undergo several important changes. No committee member spoke in favor of Rep. Litchman's bills, although it seemed that the majority of student opinion was either in opposition to HB 353 or in strong agreement with HB 467.

Ferrante & Teicher captivated Saturday fieldhouse audience

Living up to their standards of fine musical artistry and tasteful showmanship, Ferrante and Teicher created an evening of superb entertainment for their highly appreciative audience.

Their conservatory and classical training at the Juilliard School of Music (coupled with years of dedication and hard work, has contributed to a show of high caliber and popular appeal.

Their musical artistry was apparent in their pleasing arrangements of familiar tunes, their renditions of the lighter classics, and their formidable piano technique.

True to their own words, the audience was subject to a little corn and lots of ham throughout the evening.

Their humor was refreshing though, placing the audience at ease and creating the essential rapport between audience and performer.

Opening with Richard Rogers' **Slaughter on Tenth Avenue**, they soon possessed the audience with its driving rhythms and lilting melodies.

The ensemble continued to hold their audience through a variety of selections geared to offer enjoyment to all.

Big Mountain Ski Planned

For \$102.50 each, skiing buffs can spend six spring vacation days and nights shooshing and living it up at Big Mountain, near White Fish, Montana.

Price includes round-trip train fare, lodgings, meals and lift tickets.

Latest reports indicate the snow is powdery and the entertainment nightly.

For information and brochures contact Dean Ray Payne's office, 208 in the Student Center, no later than today.
